H0105 Manual de montaje

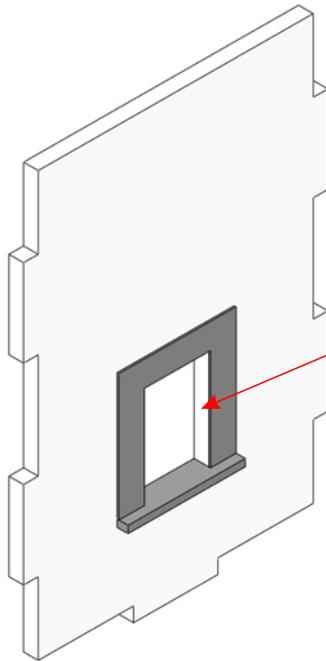

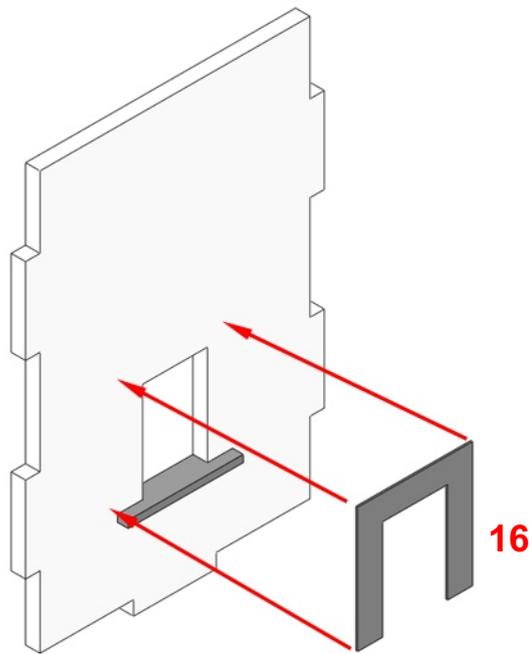

Este manual indica como hemos montado el kit en el taller de Parvus. Seguramente otros procedimientos son posibles y quizás mejores.

En cuanto a la pintura hemos optado por pintar las piezas antes de colocarlas en su lugar y así se indica en este manual pero, al igual que el montaje, otras soluciones son posibles.

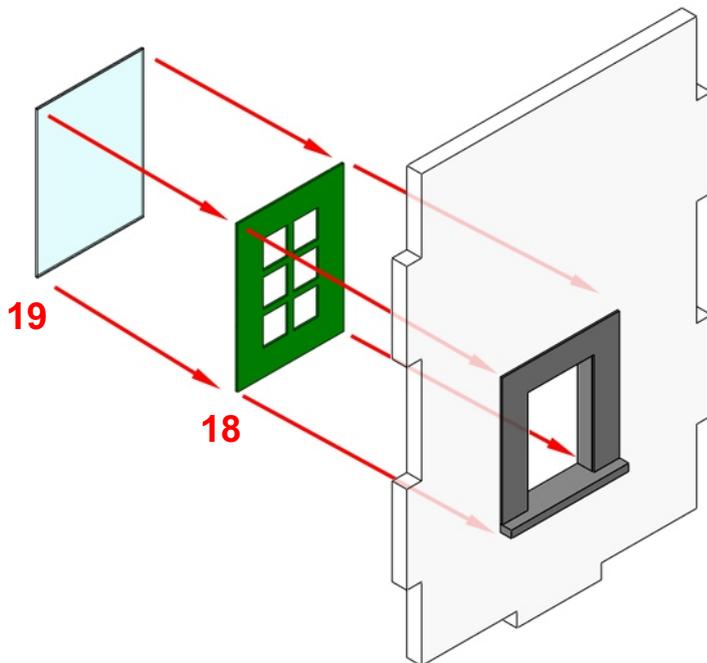

¡ Suerte !

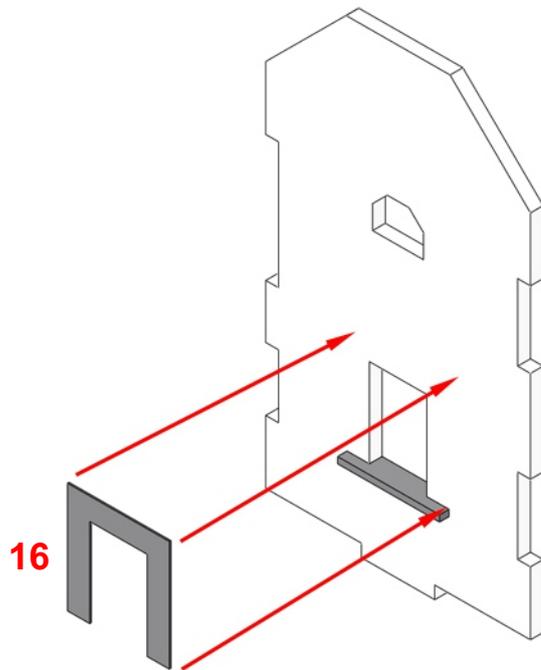

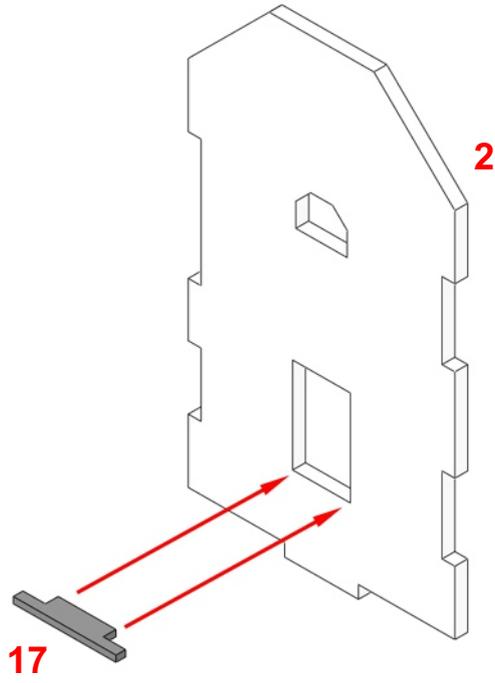

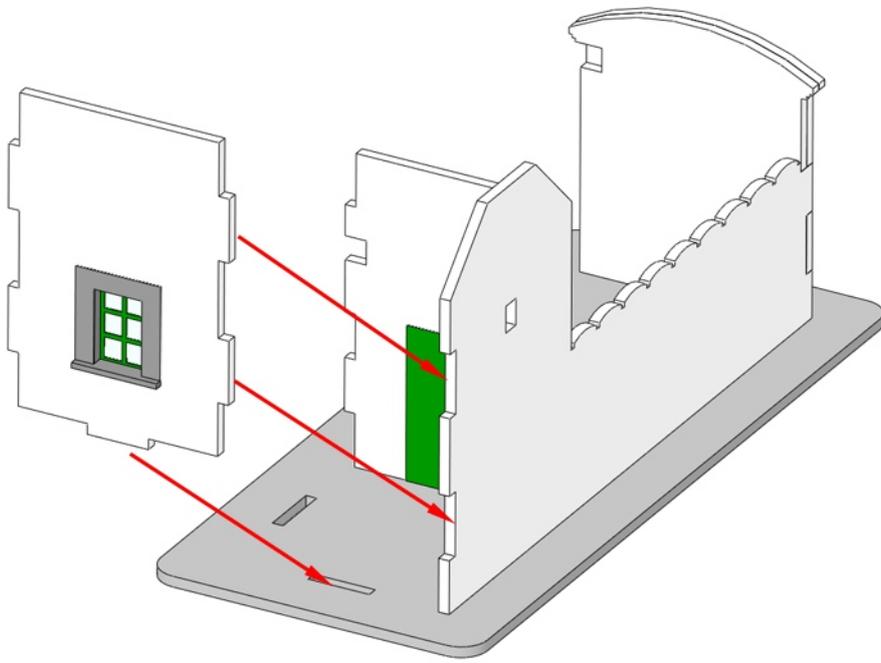

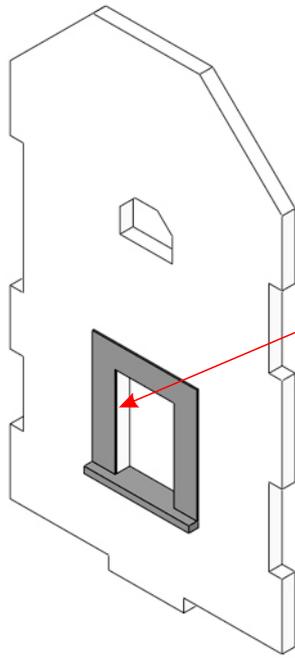

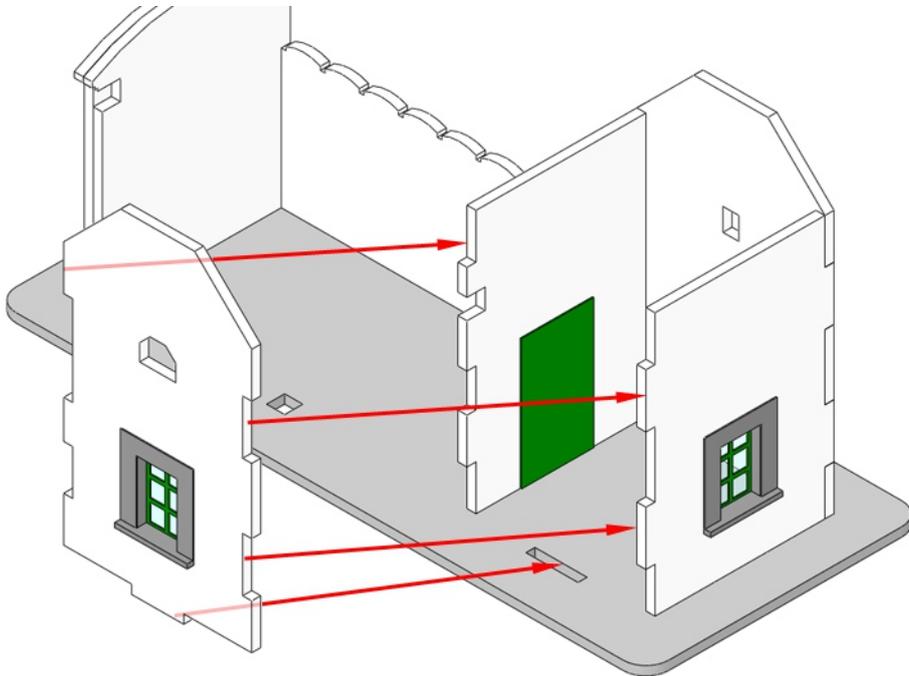

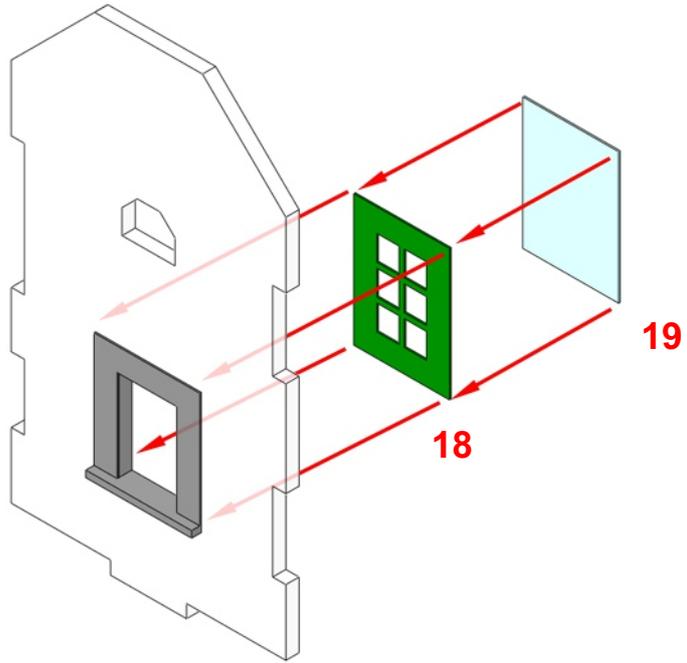

Pintar el interior de la ventana del mismo color que el marco exterior

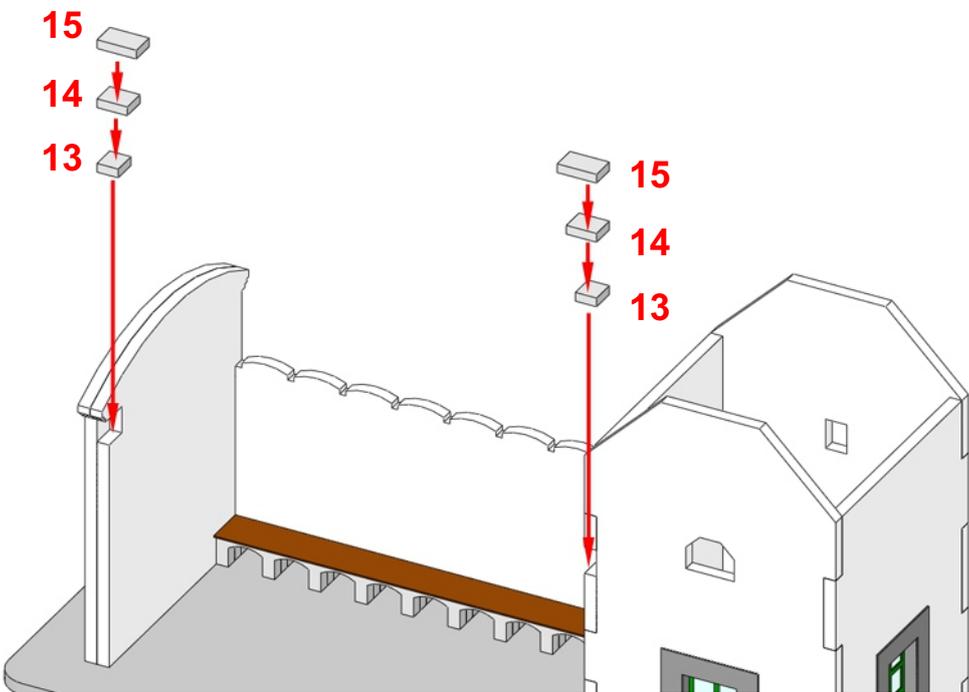

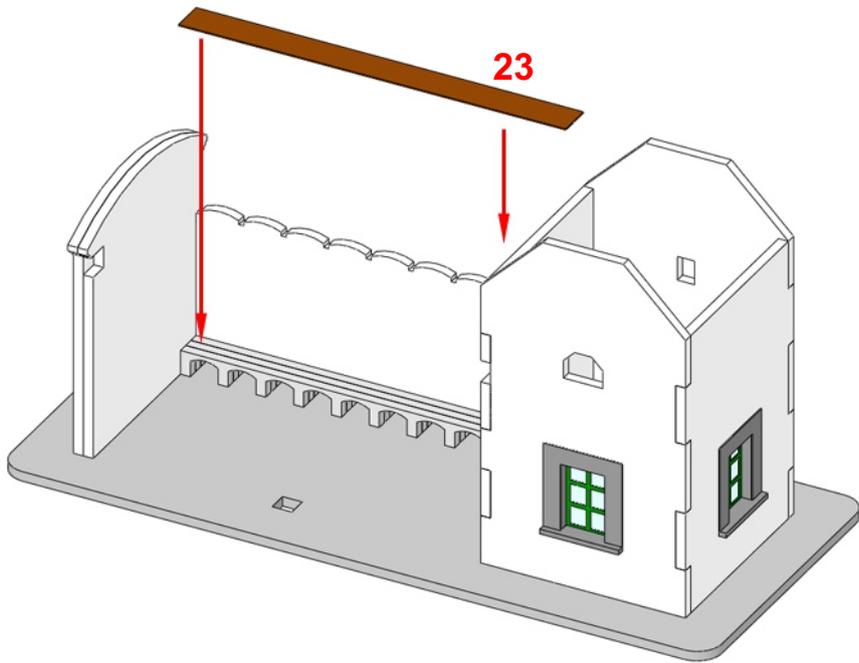

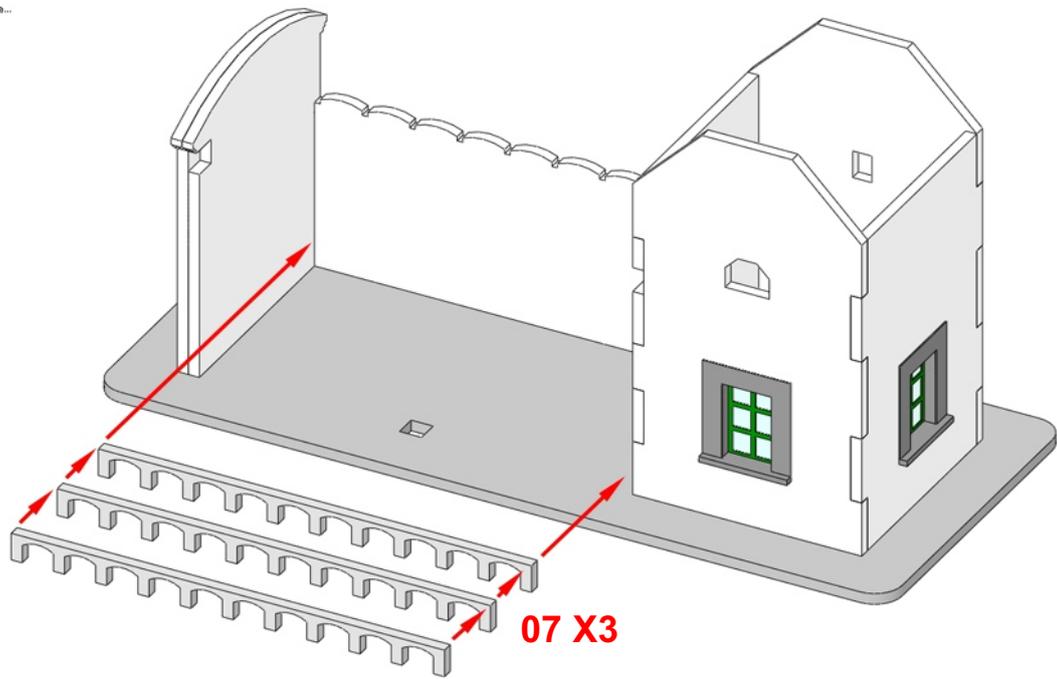

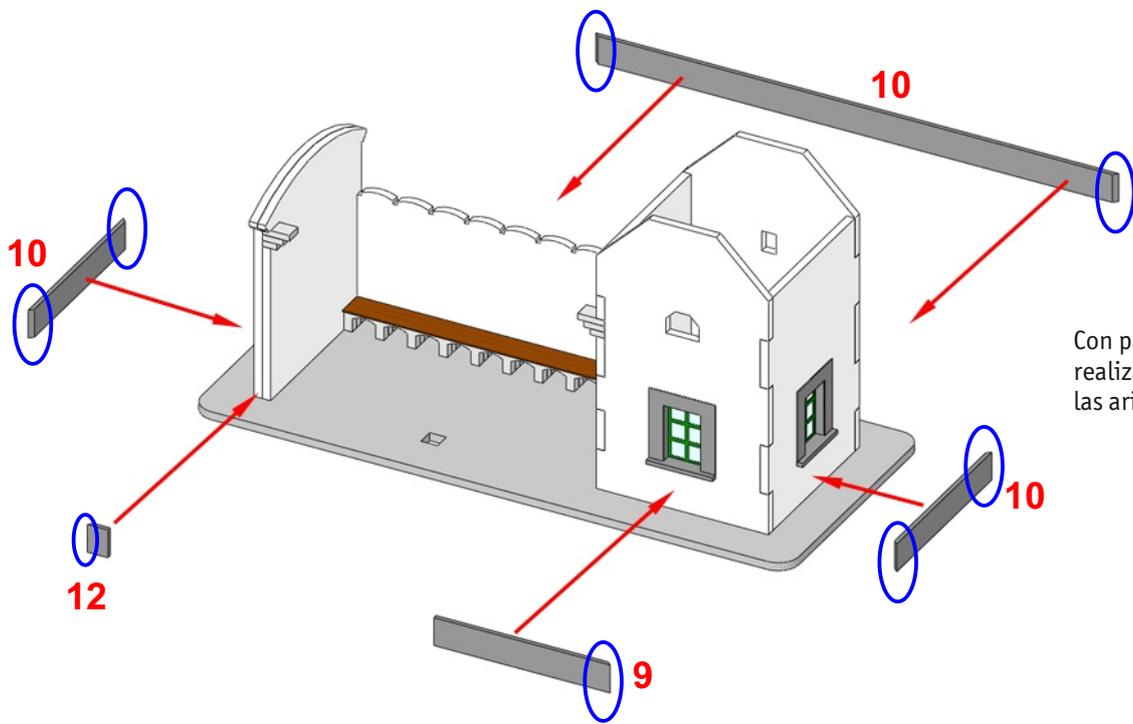

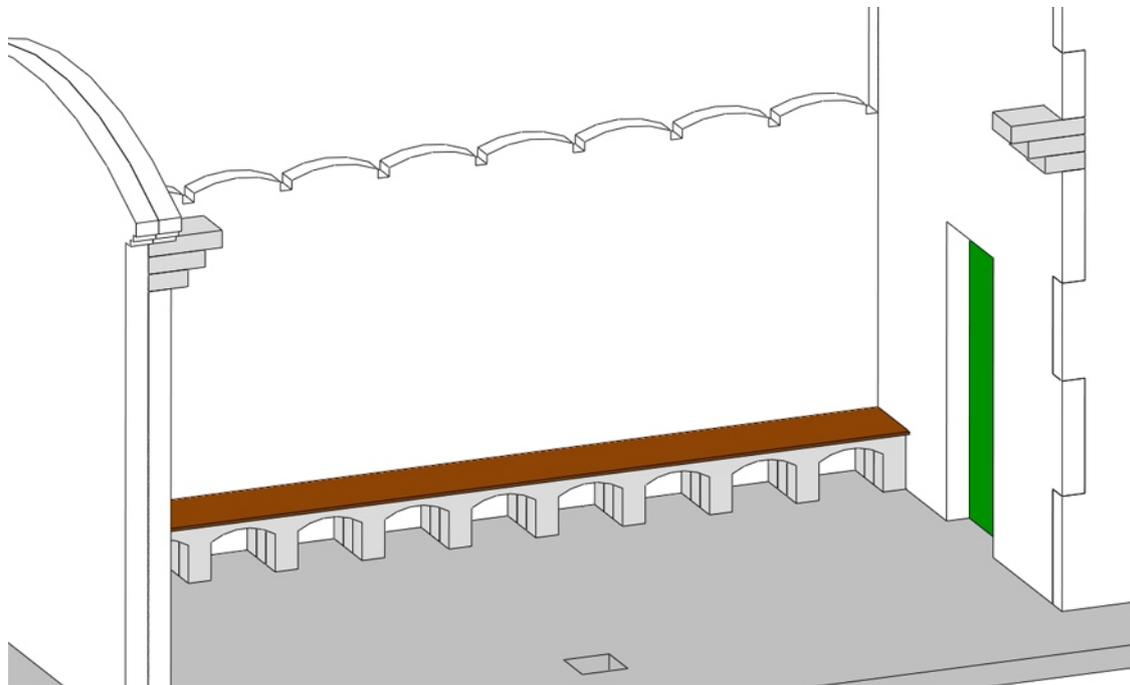

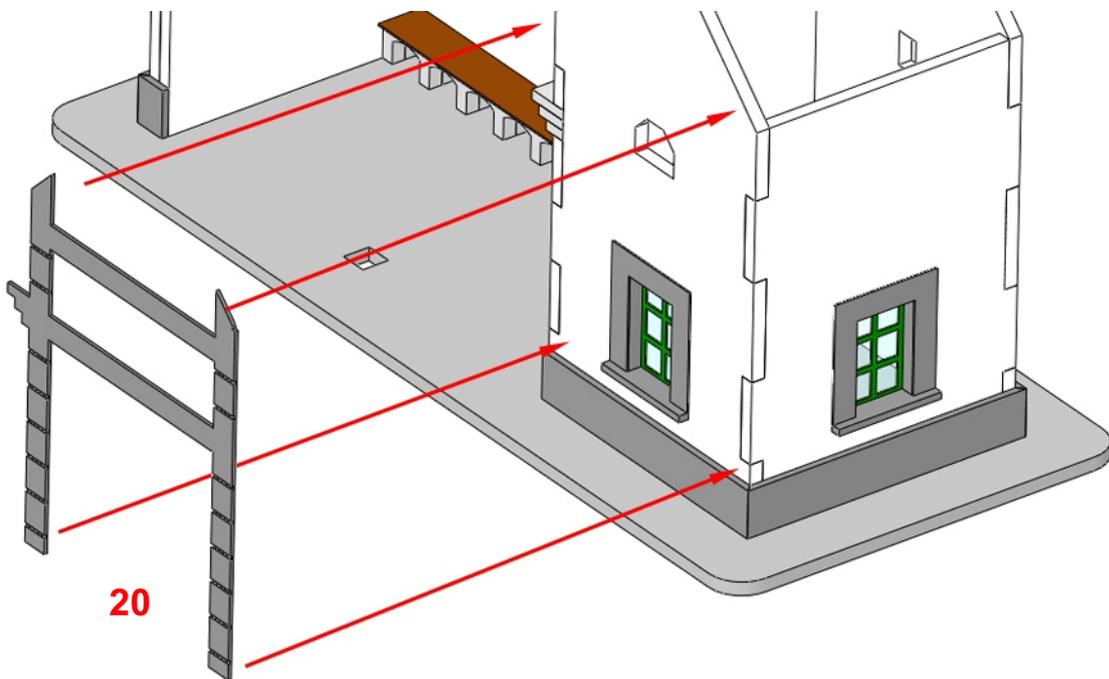

Pintar el interior de la ventana del mismo color que el marco exterior

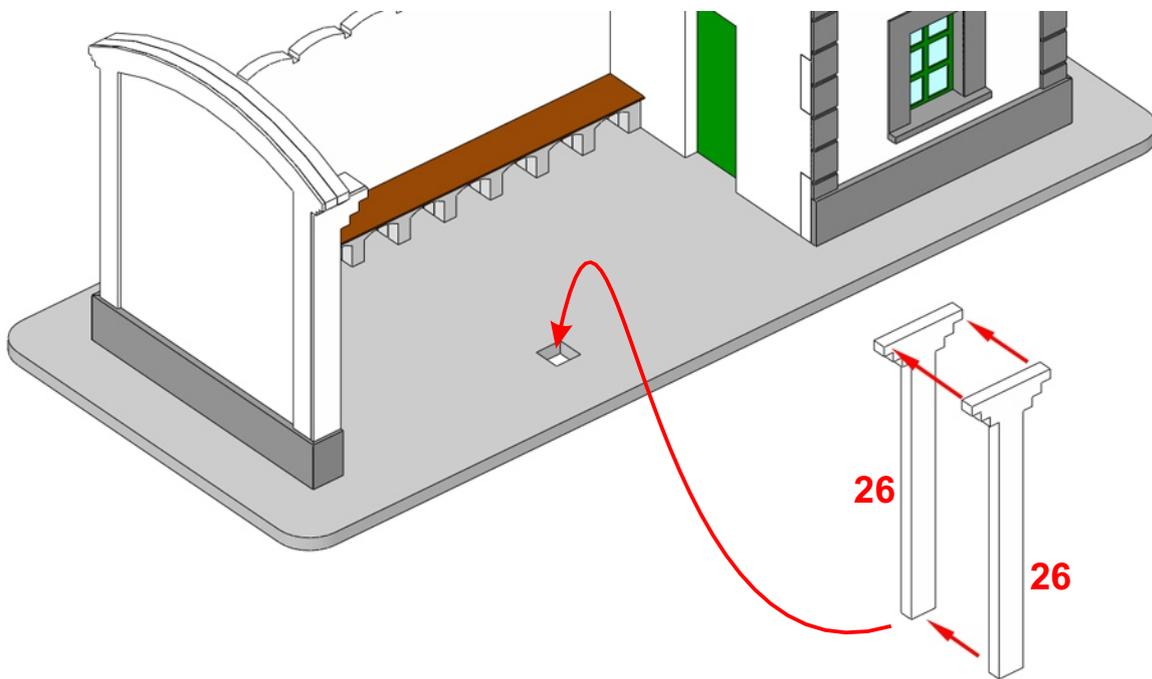

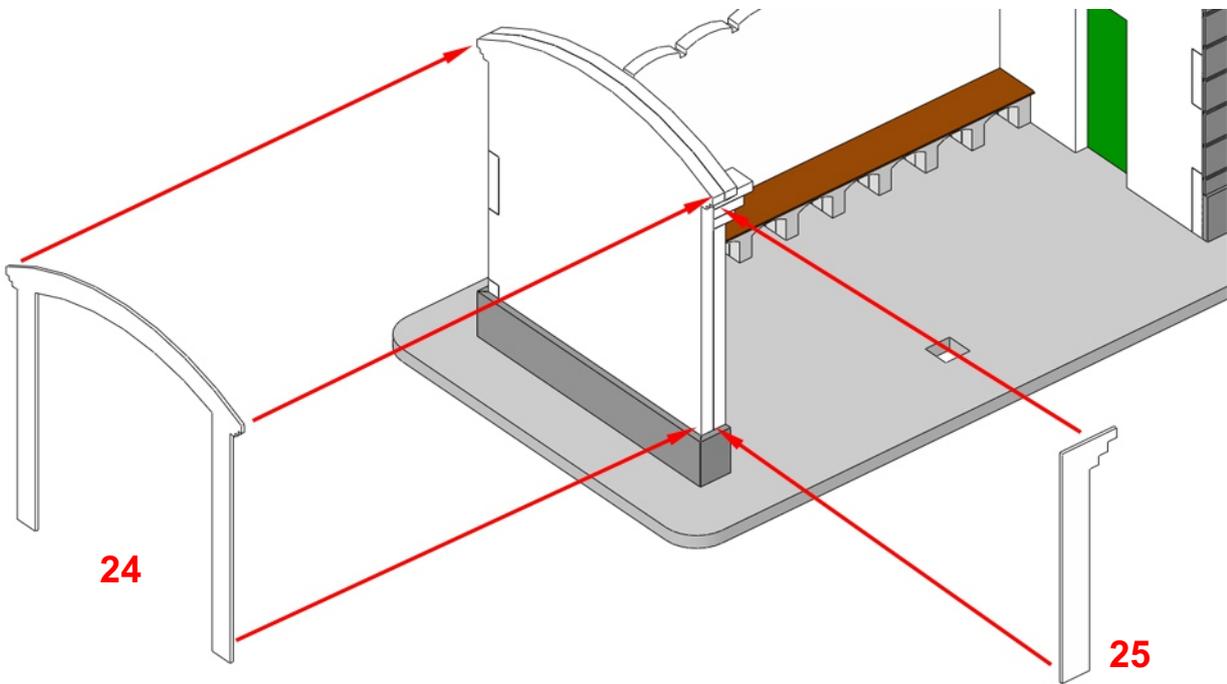

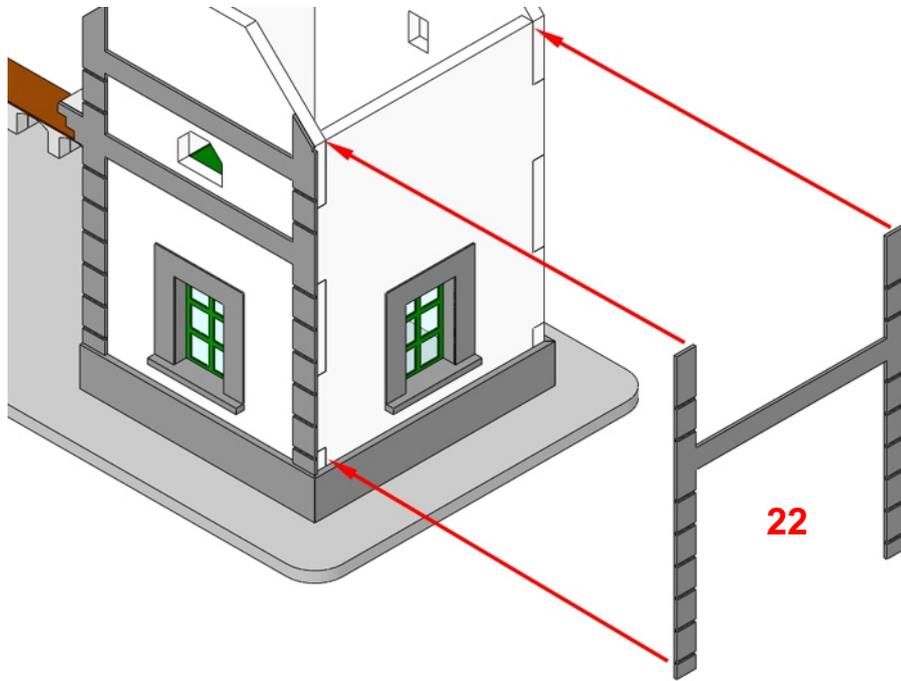

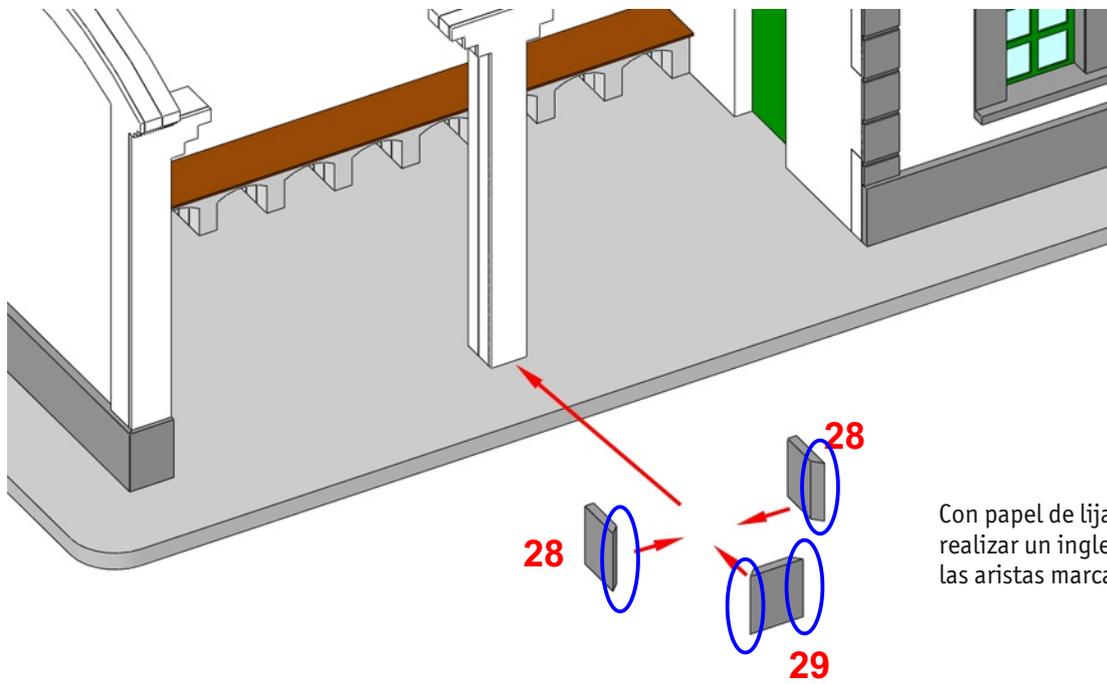

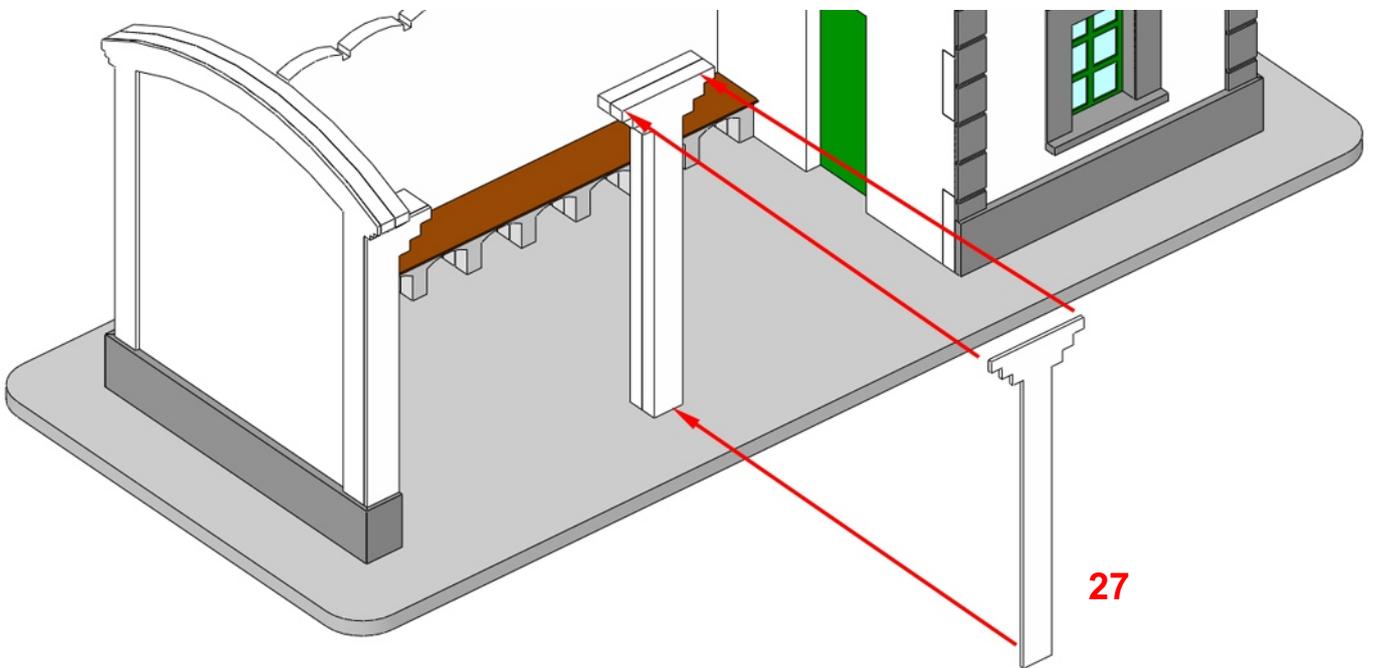

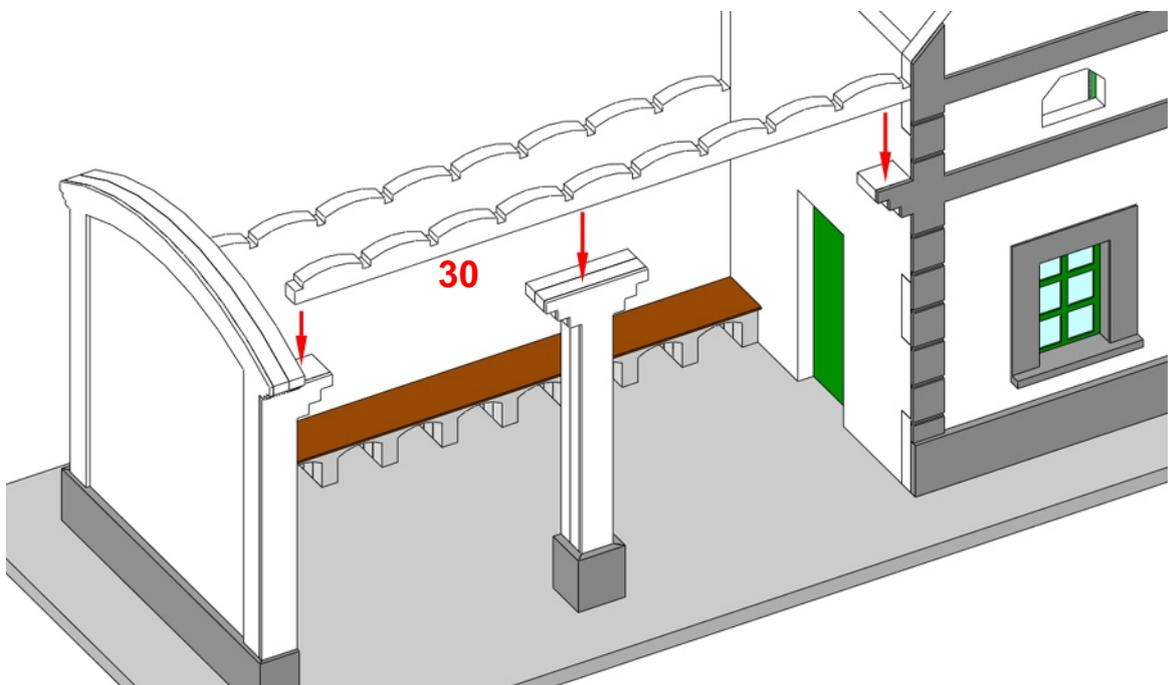

Con papel de lija o cutter, realizar un inglete a 45° en las aristas marcadas de azul.

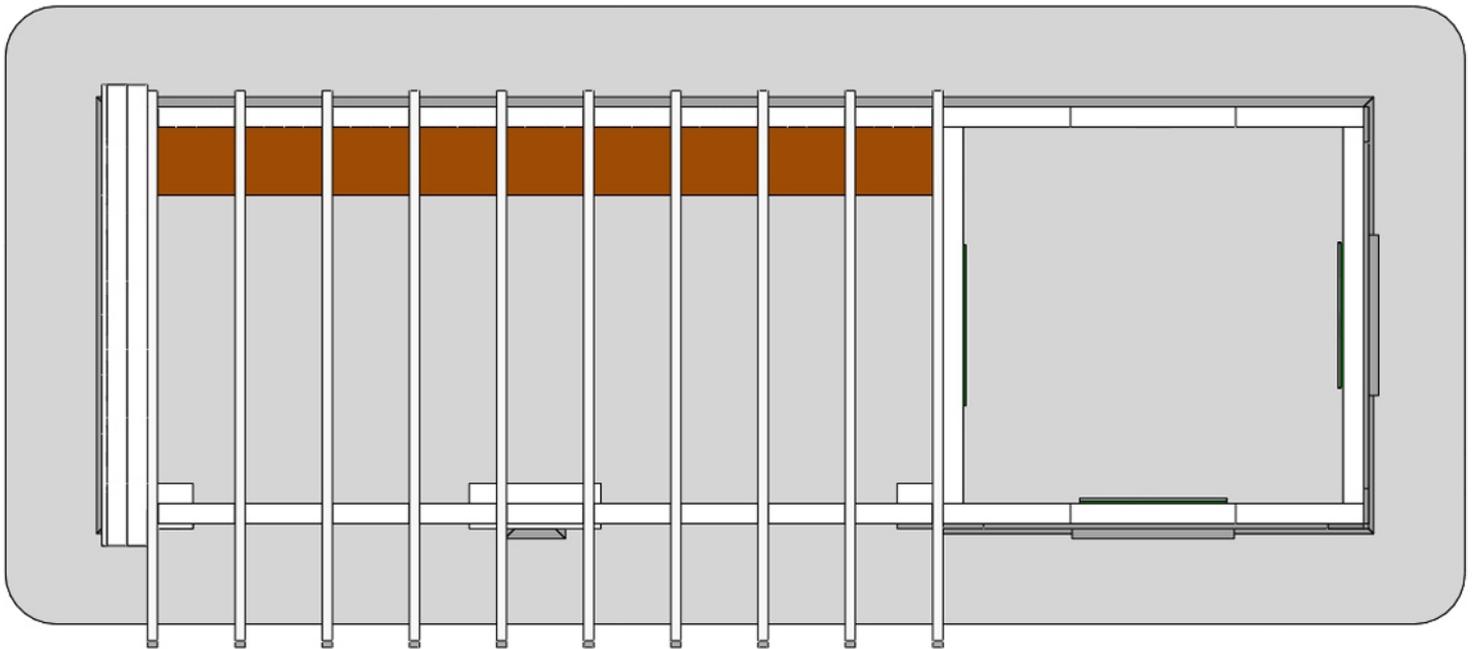

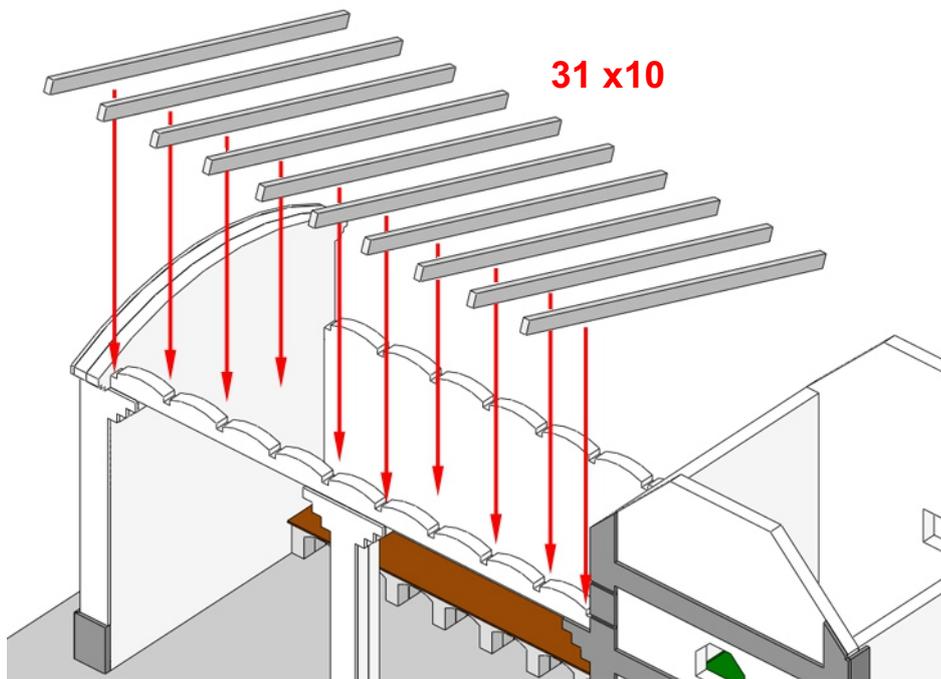

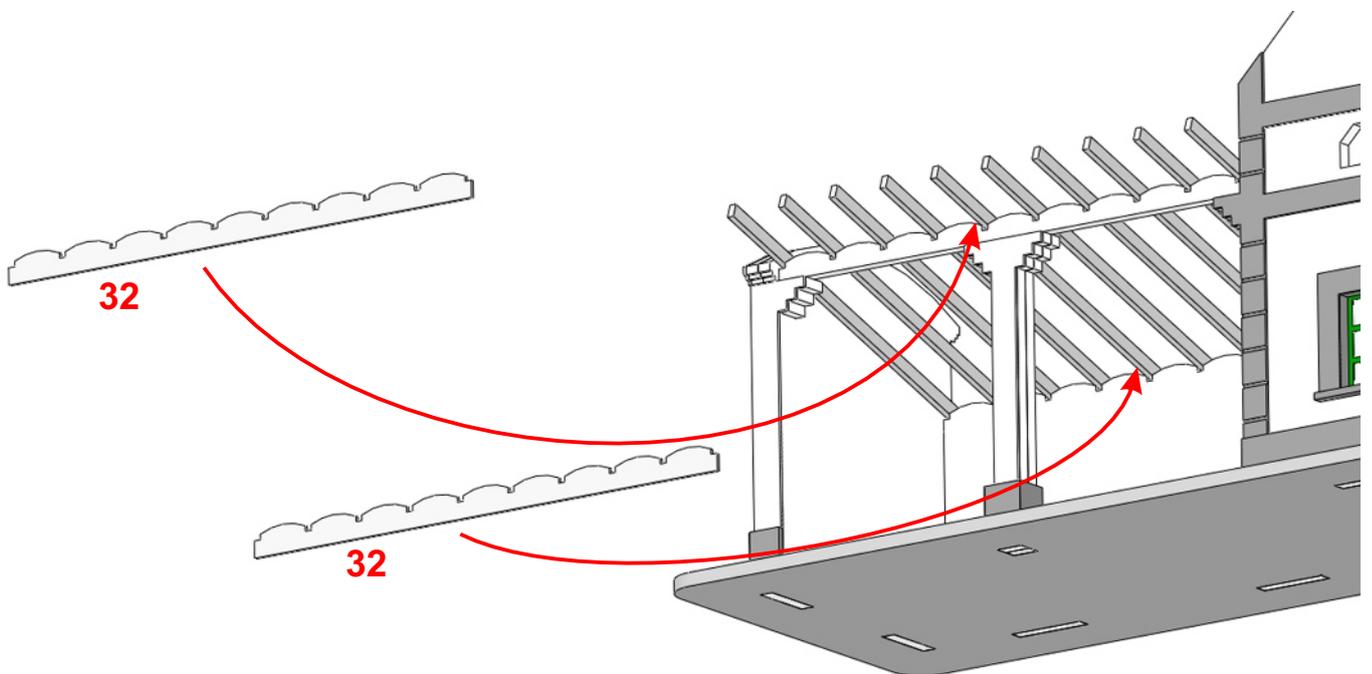

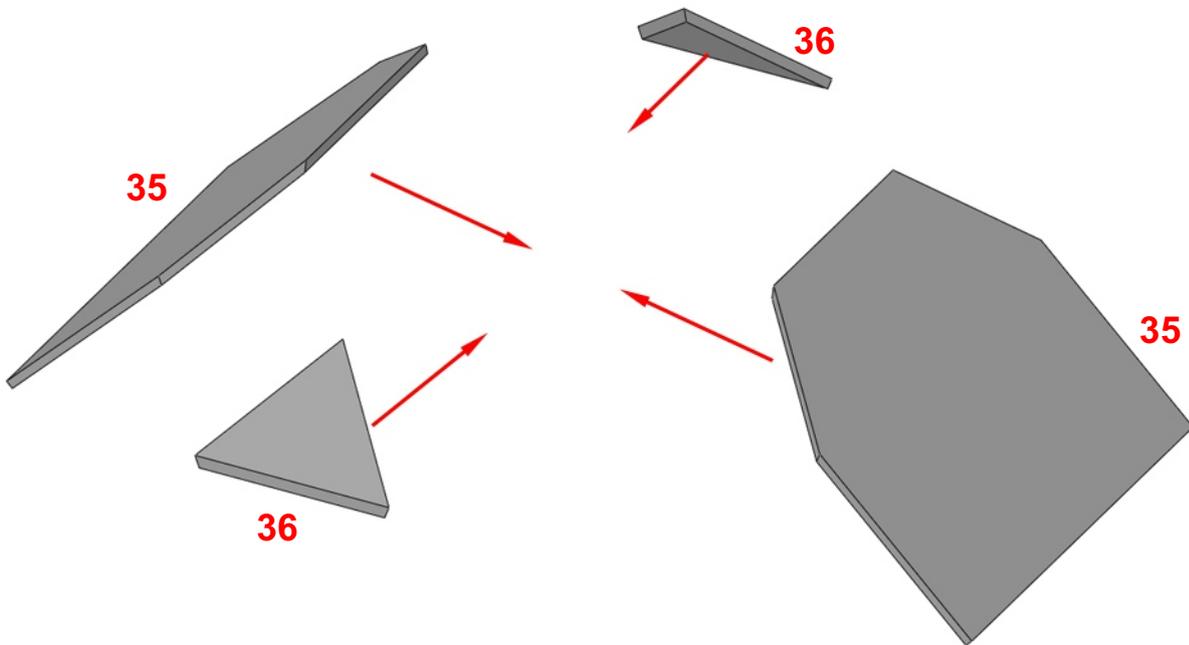

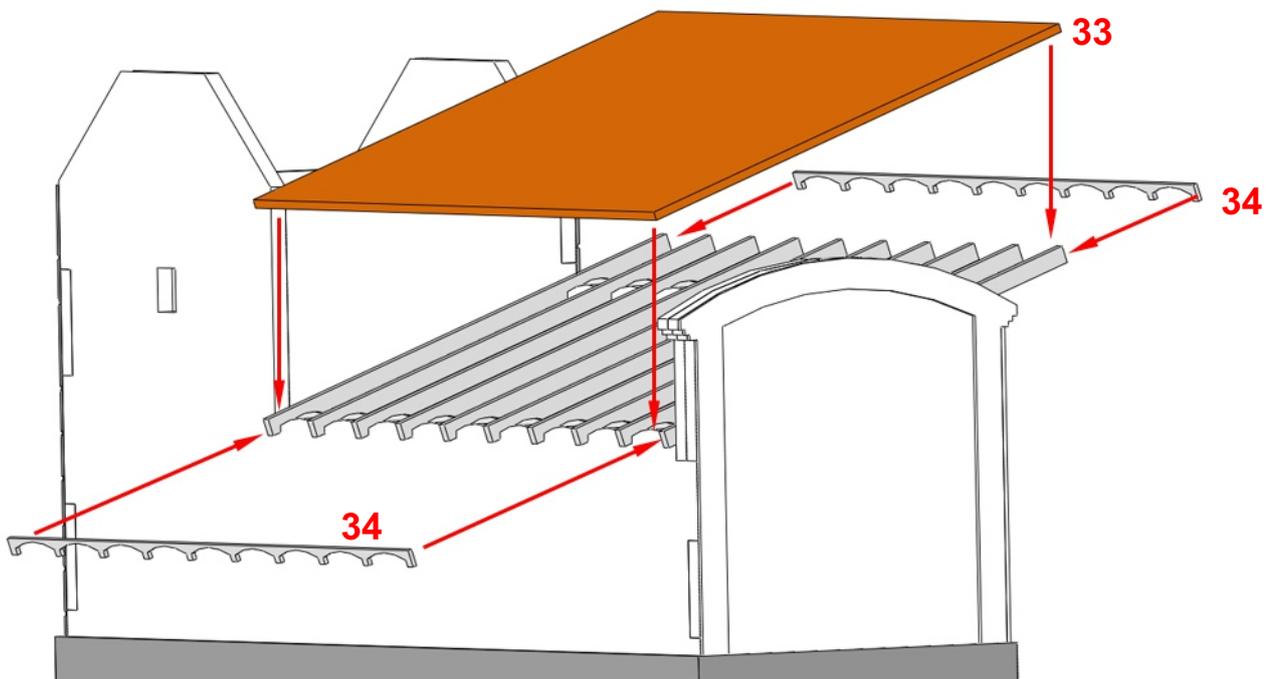

Con papel de lija o cutter, realizar un inglete a 45° en las aristas marcadas de azul.

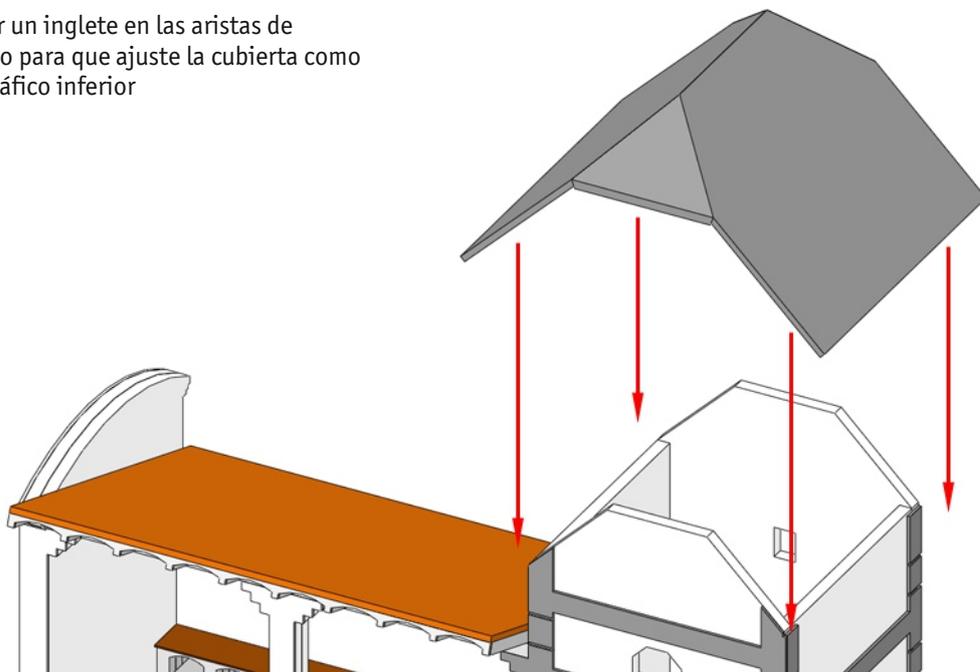

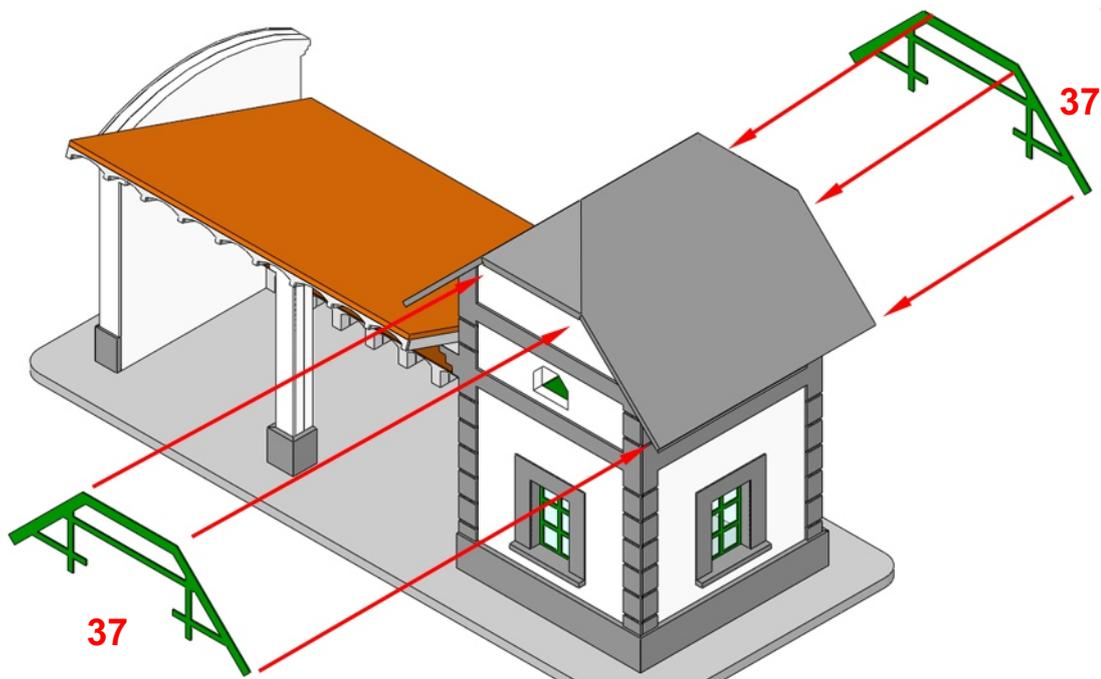

Vista en planta de las vigas en su lugar

Realizar un inglete en las aristas de contacto para que ajuste la cubierta como en el gráfico inferior

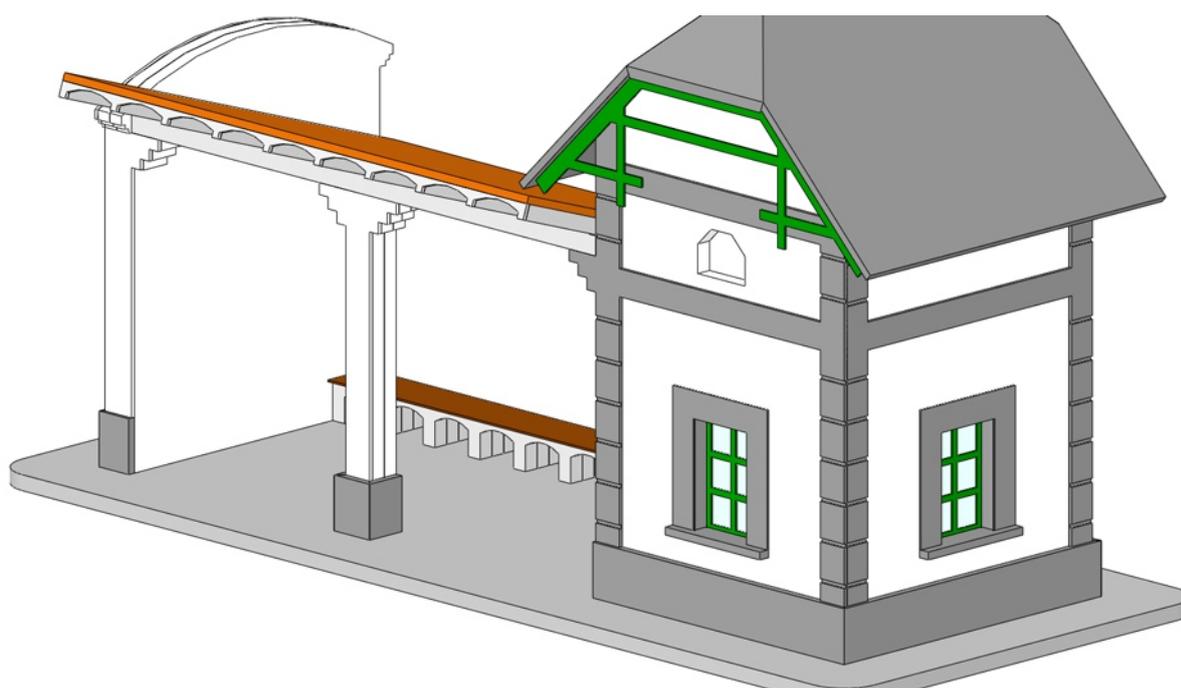

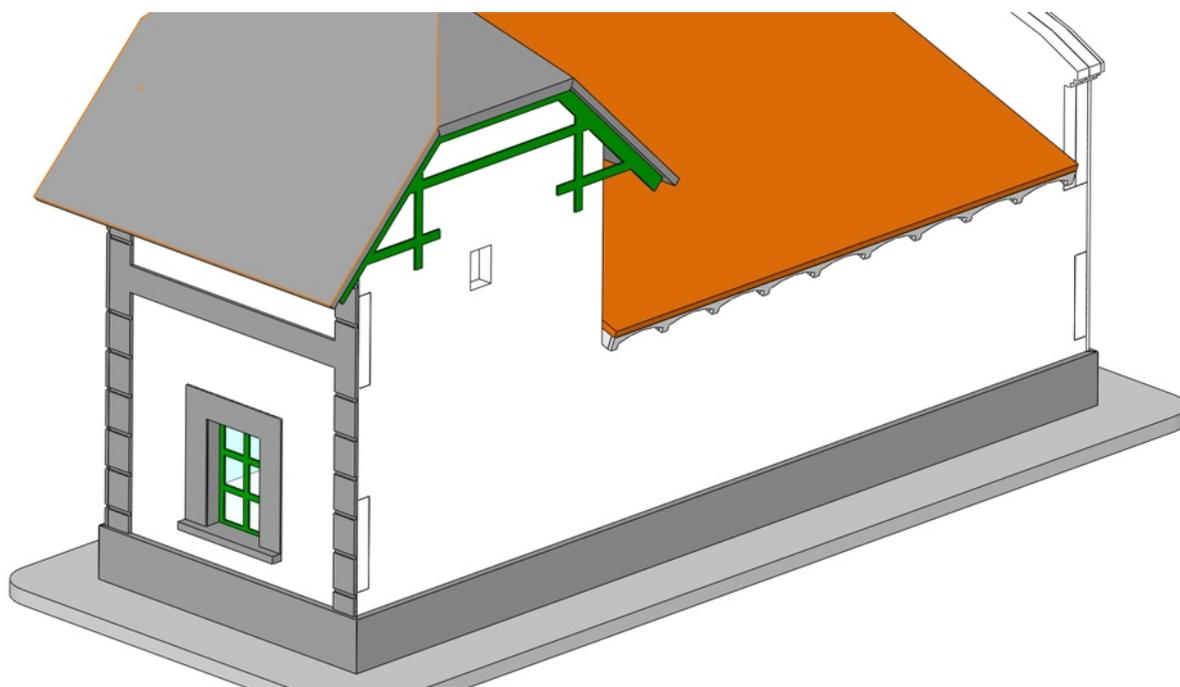

pegar estos ornamente 1 o 2 milímetros
hacia el interior de la cubierta

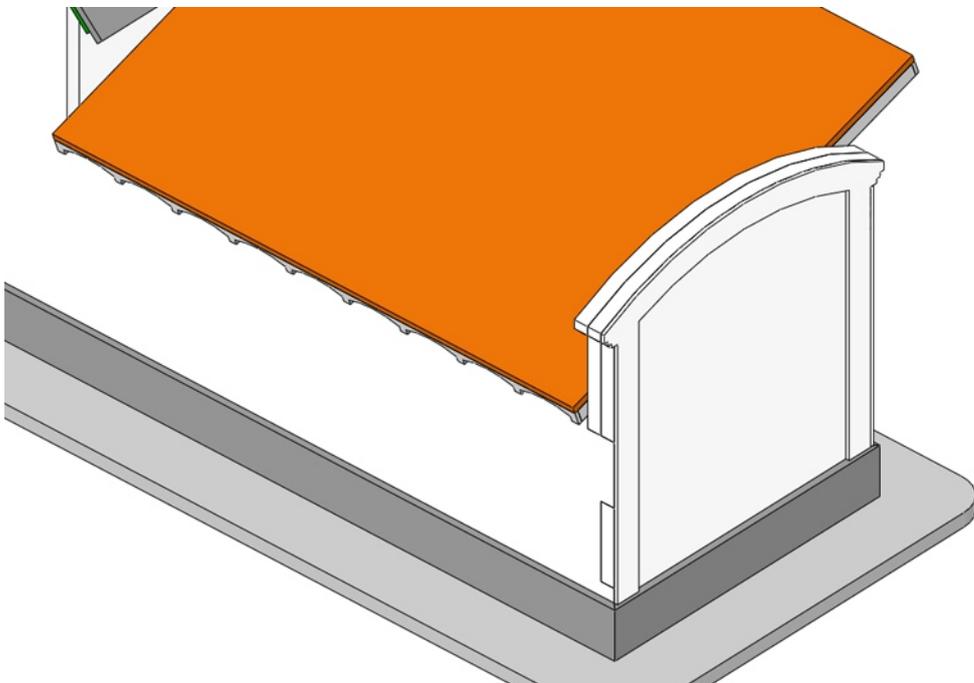

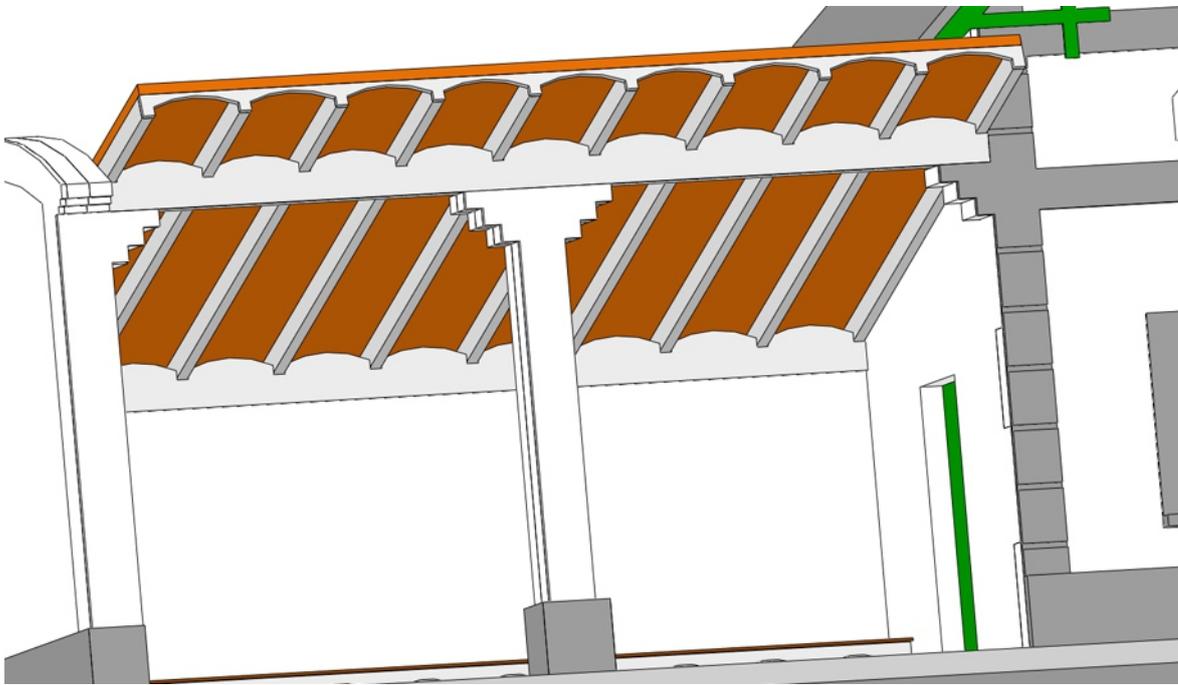

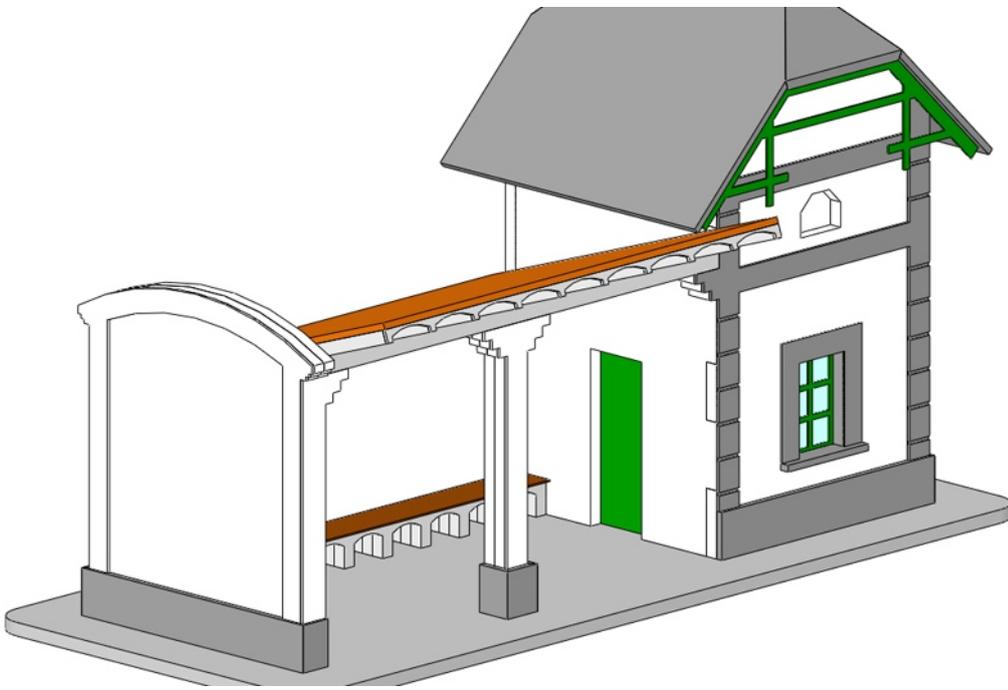

Montaje terminado.

Proceder ahora al retoque de pintura, retoques de masilla y al final el envejecimiento.

En las siguientes páginas aparecen algunos gráficos que pueden ayudar en el ajuste del kit.
