H-0918 Fachada Marqués de Argentera - Manual de montaje

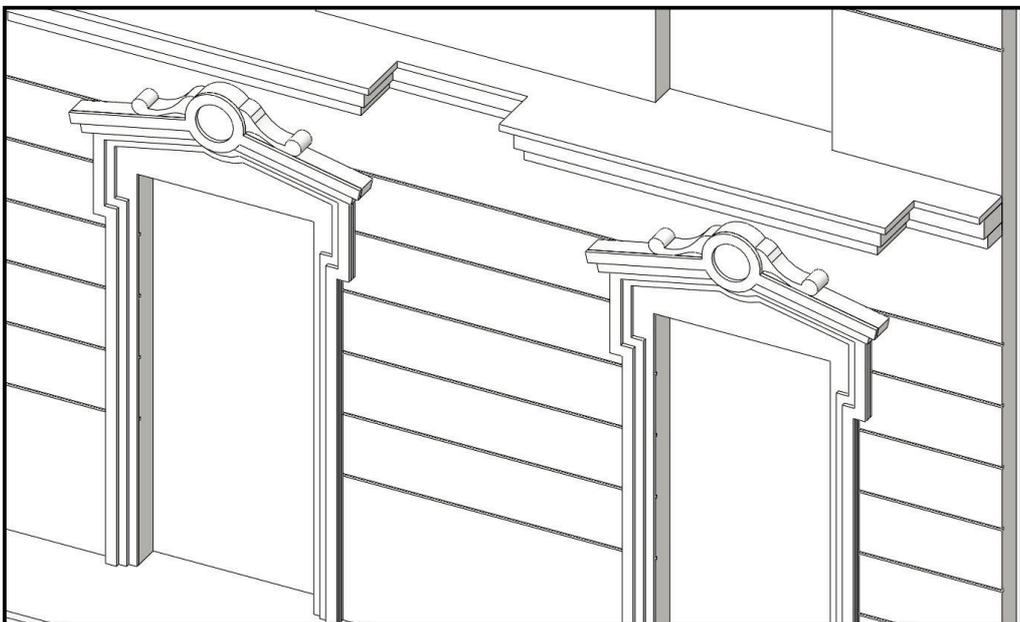

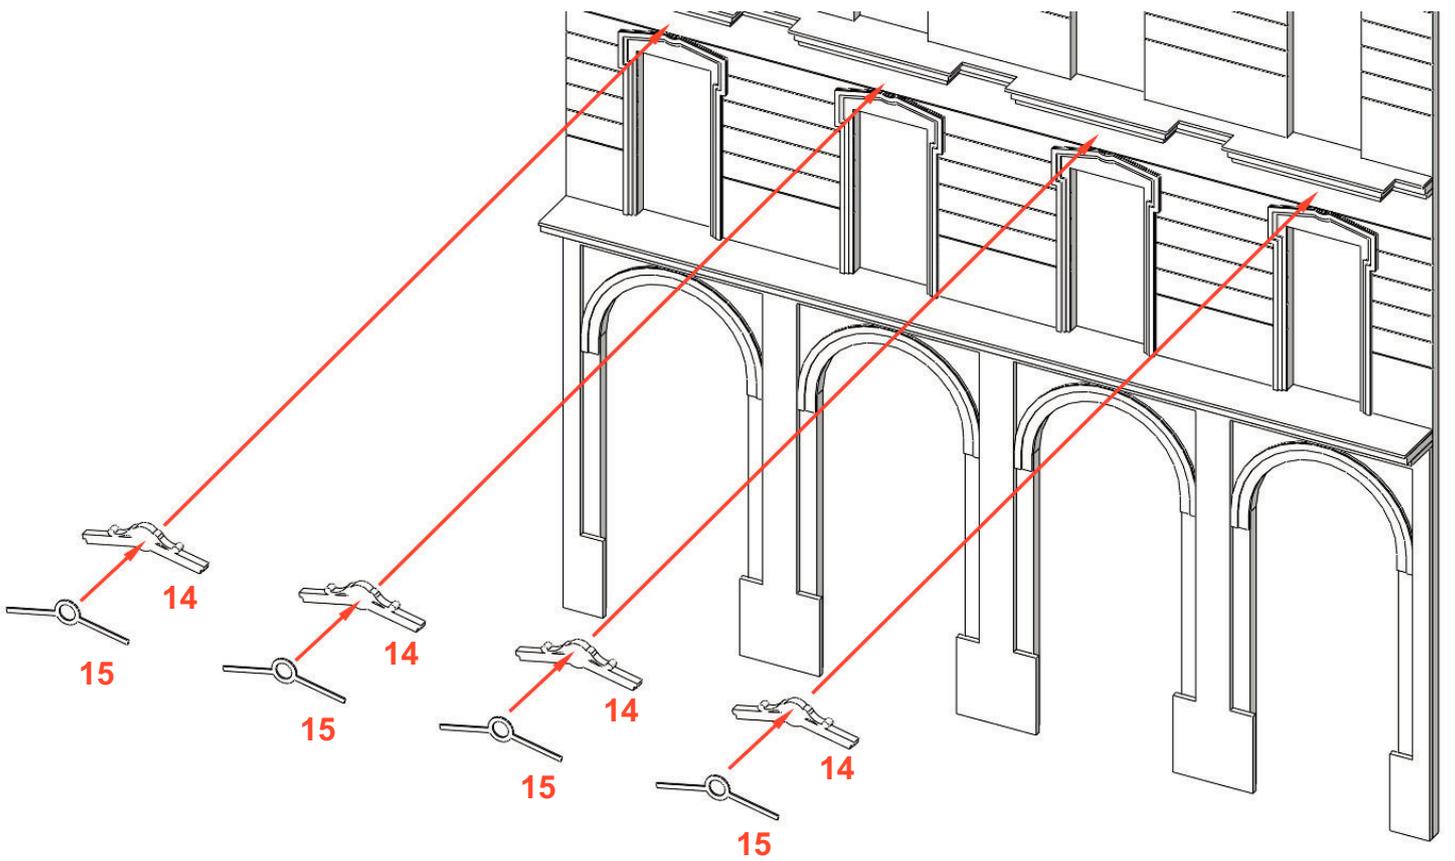

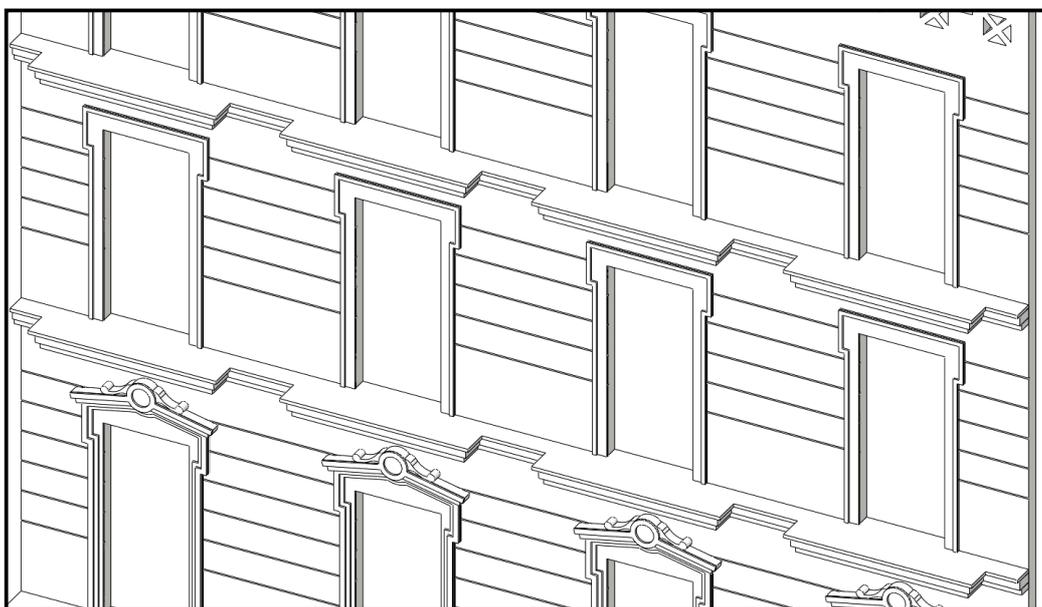

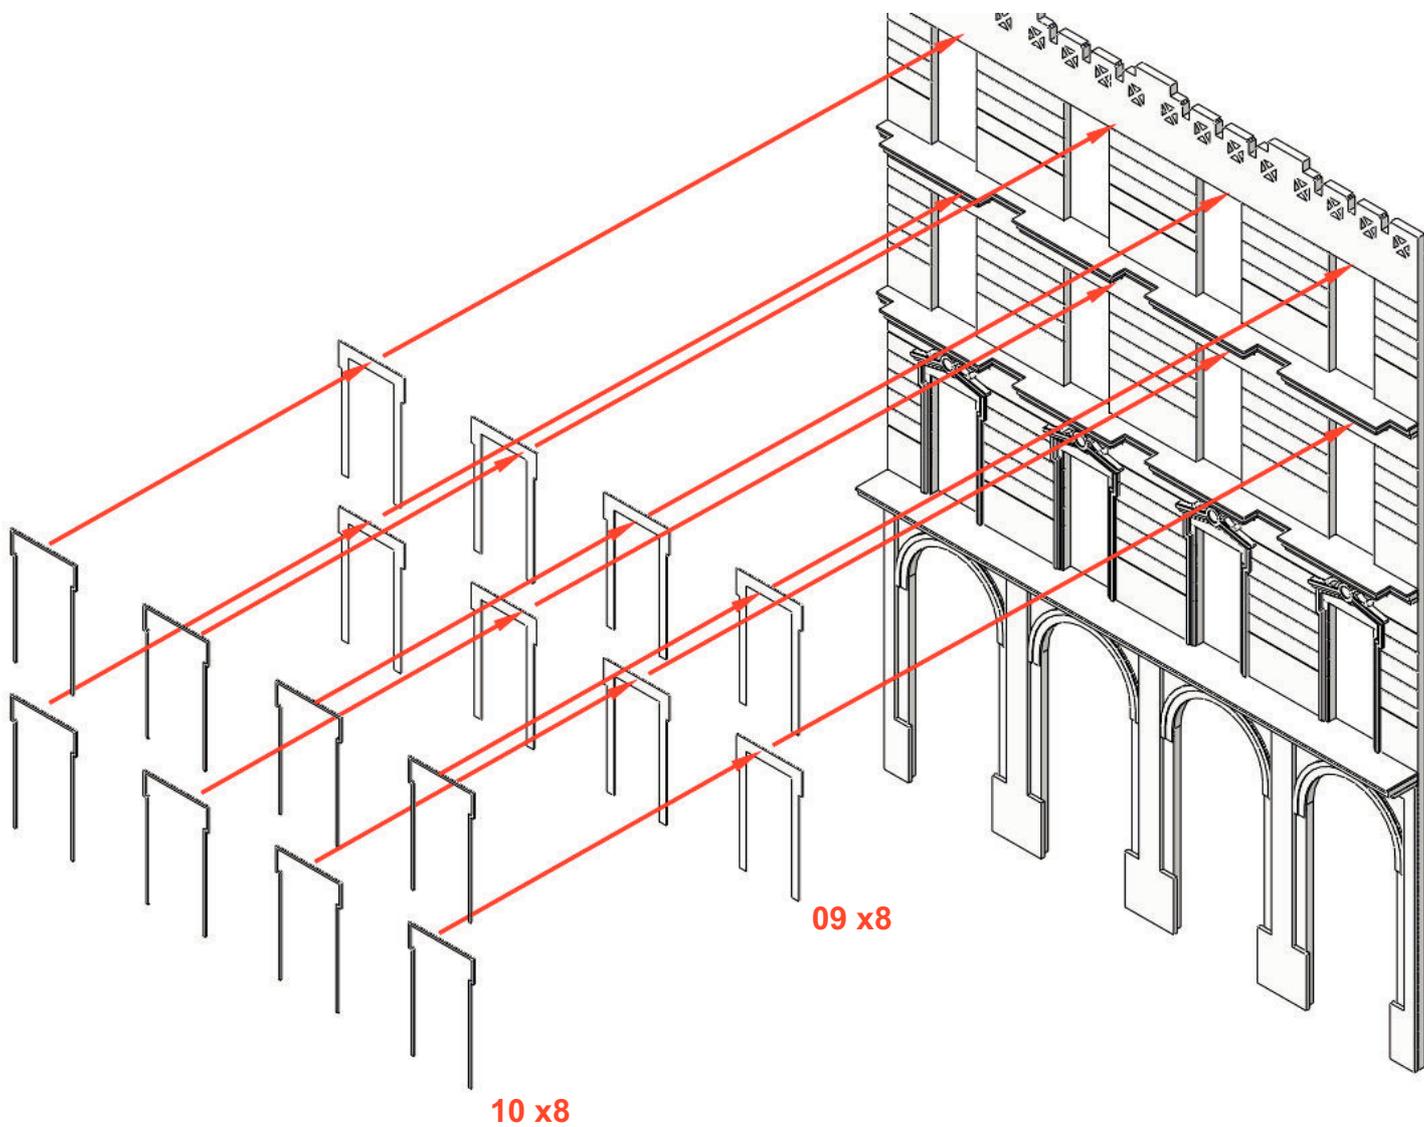

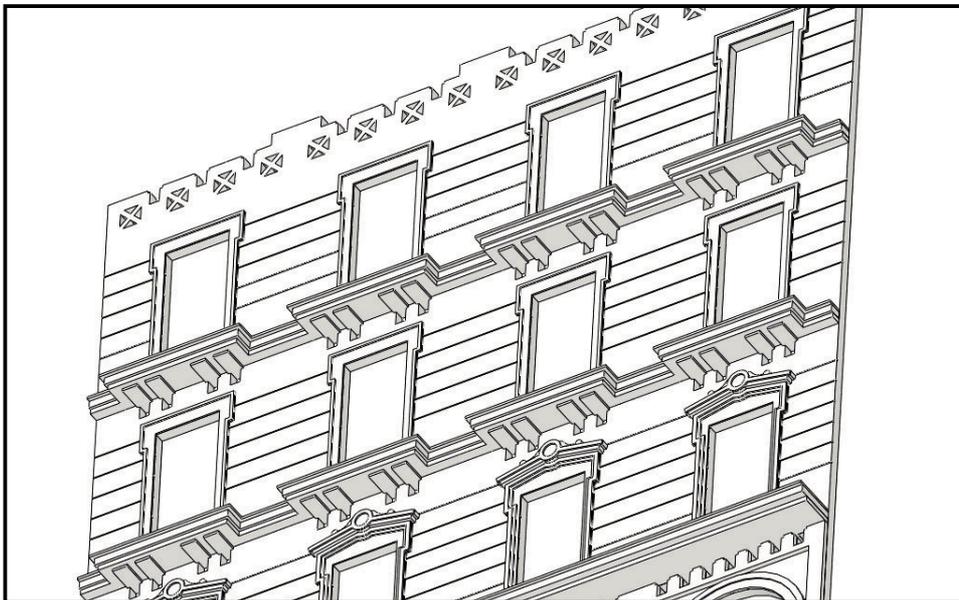

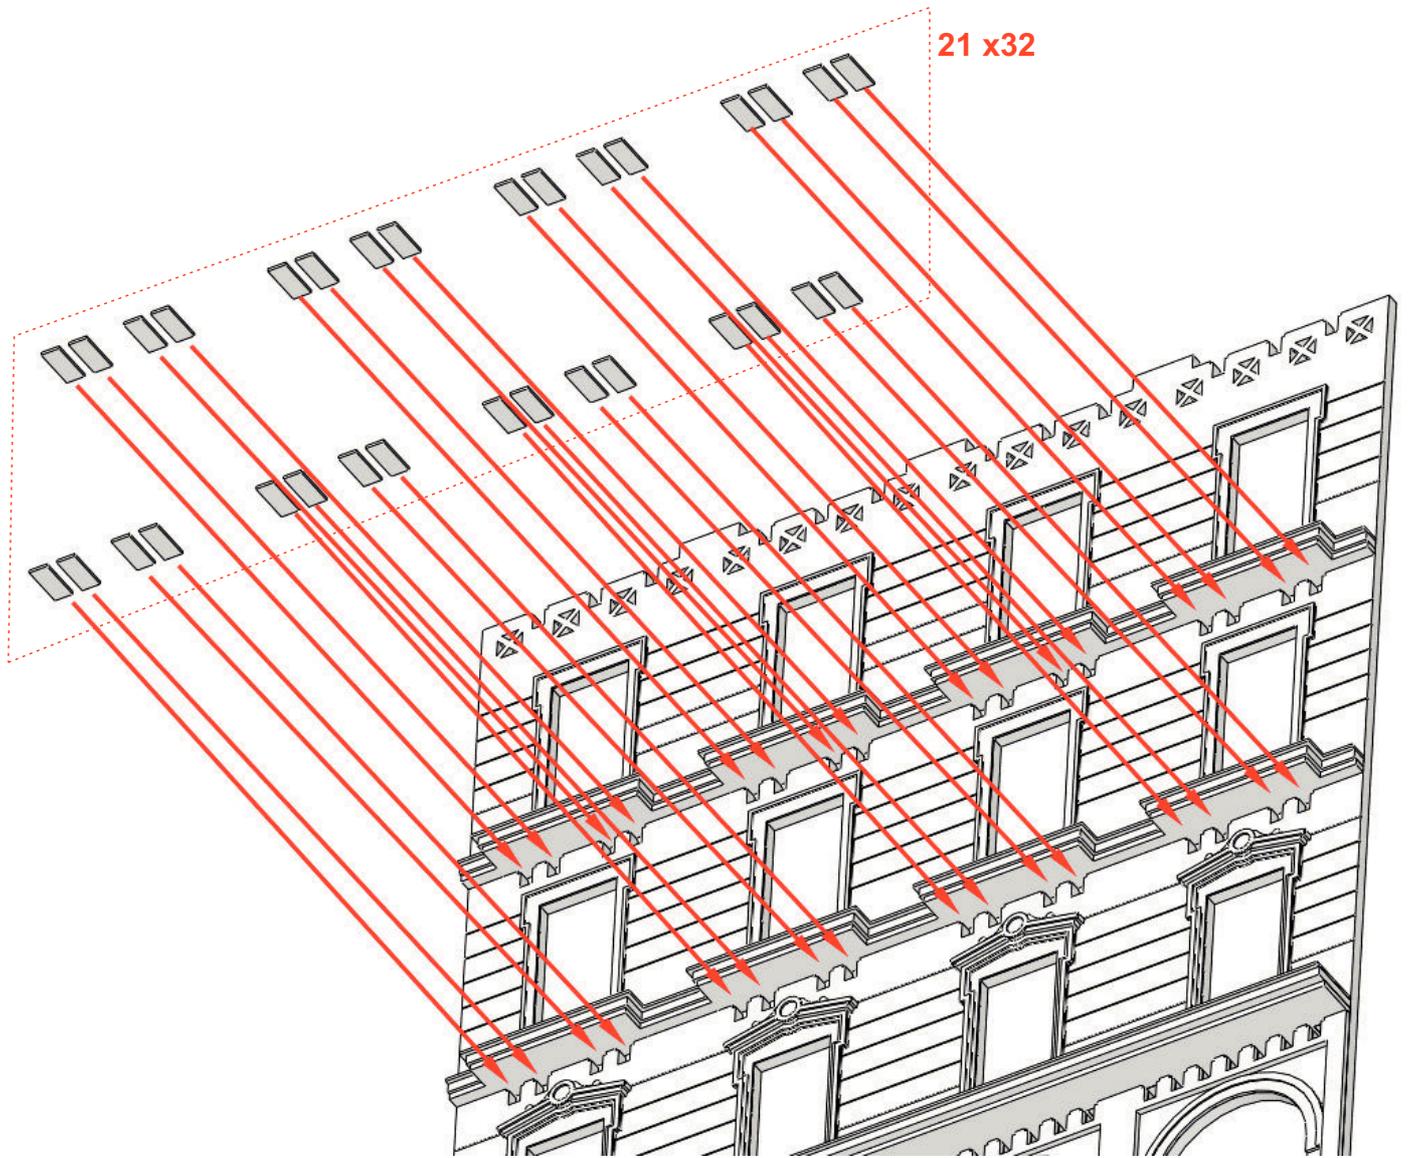

La base de los pilares que acaba de pegar debe sobresalir 1 milimetro por cada lado de los pilares de la fachada. Justo donde indican las flechas rojas.

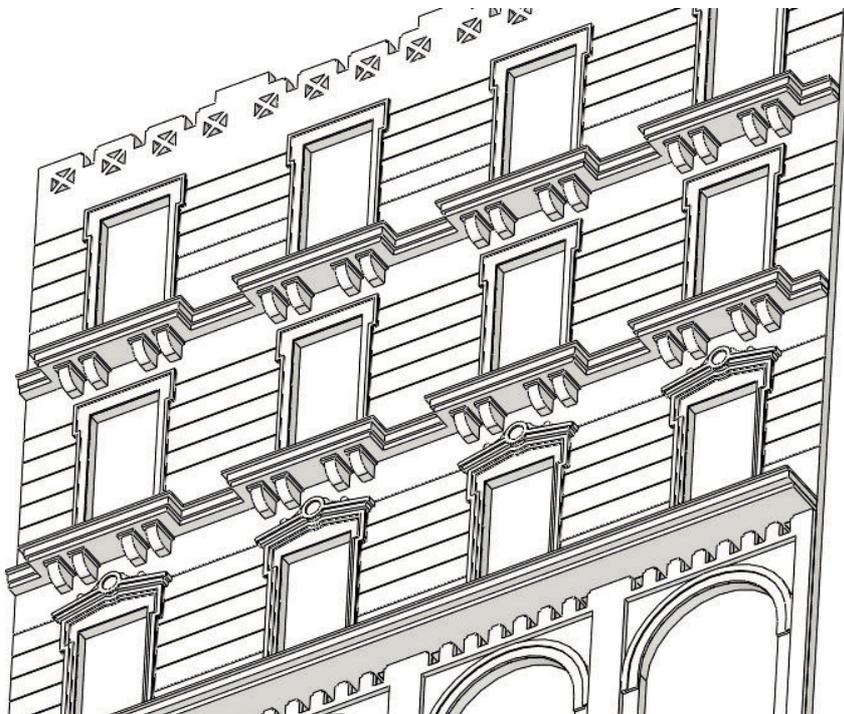

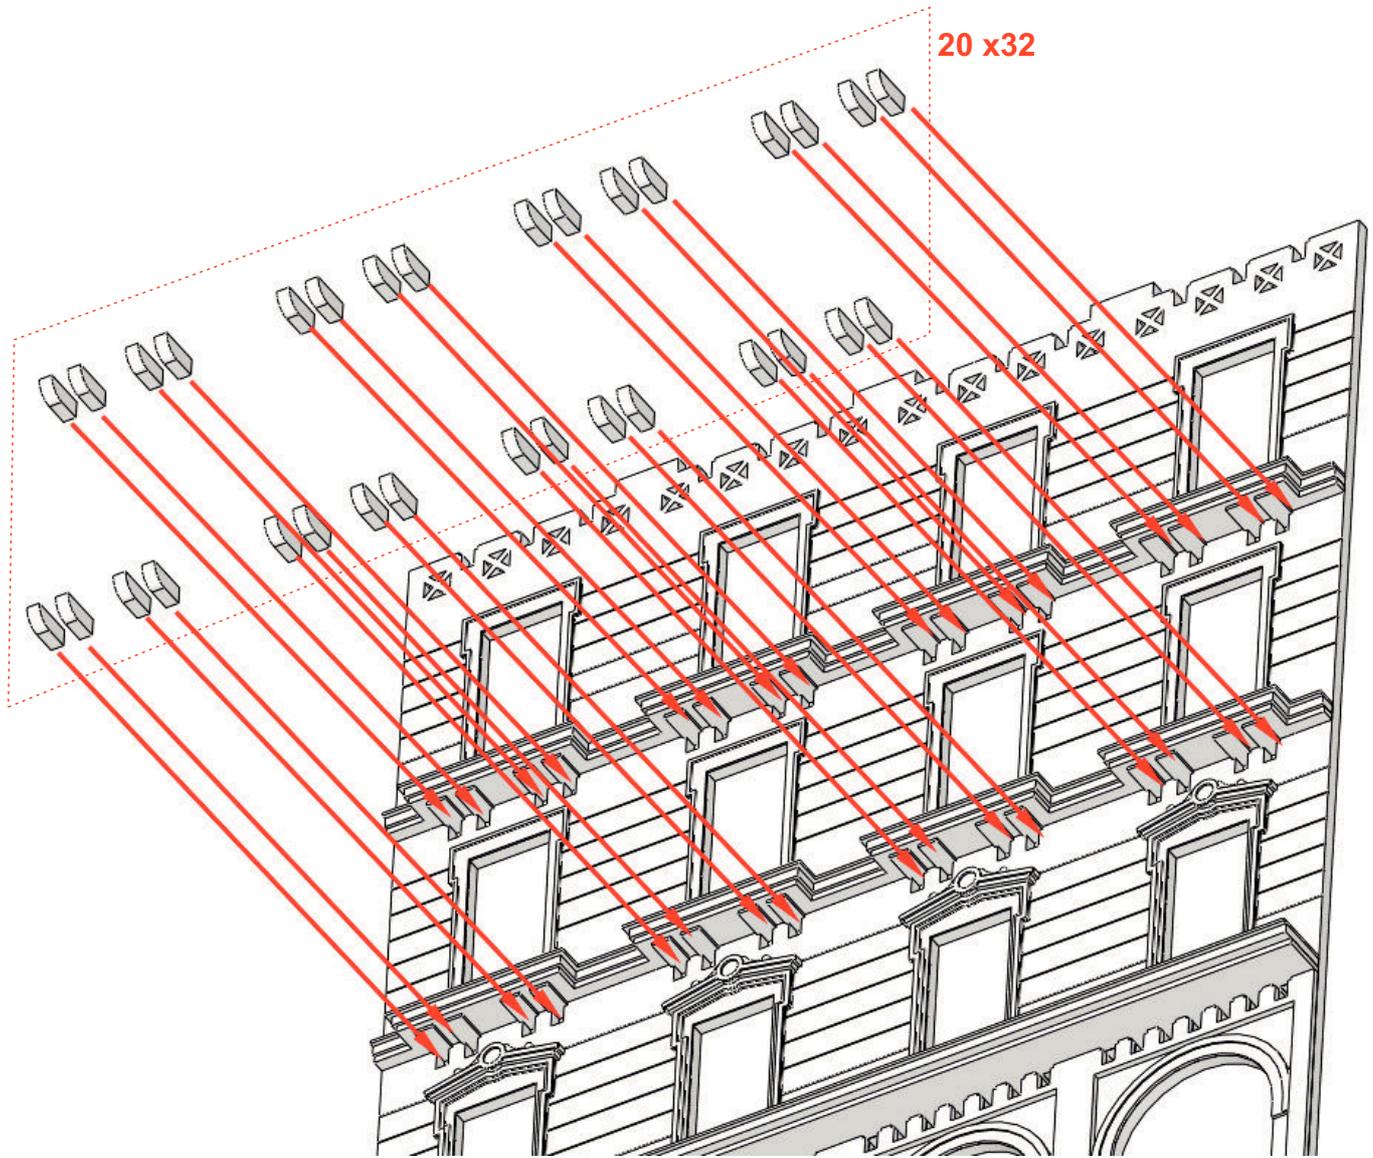

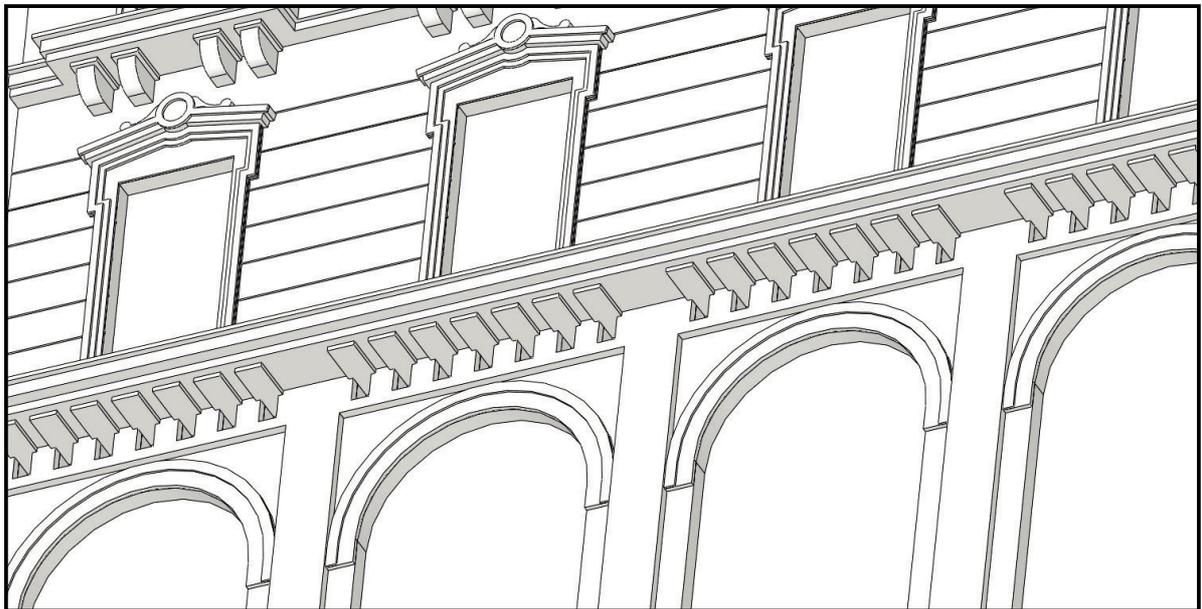

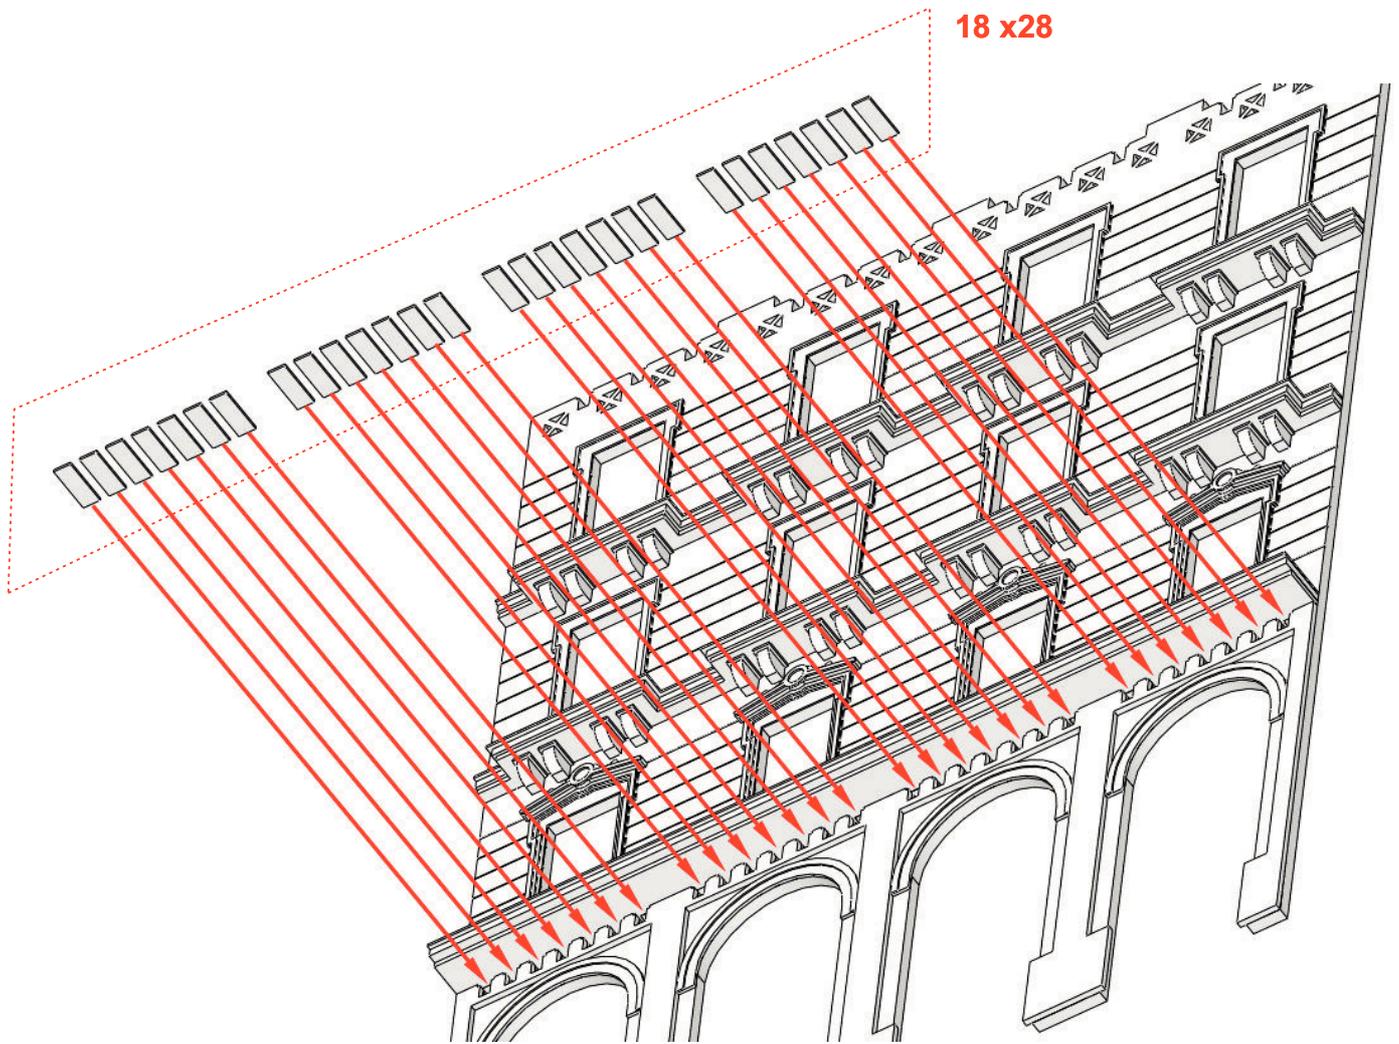

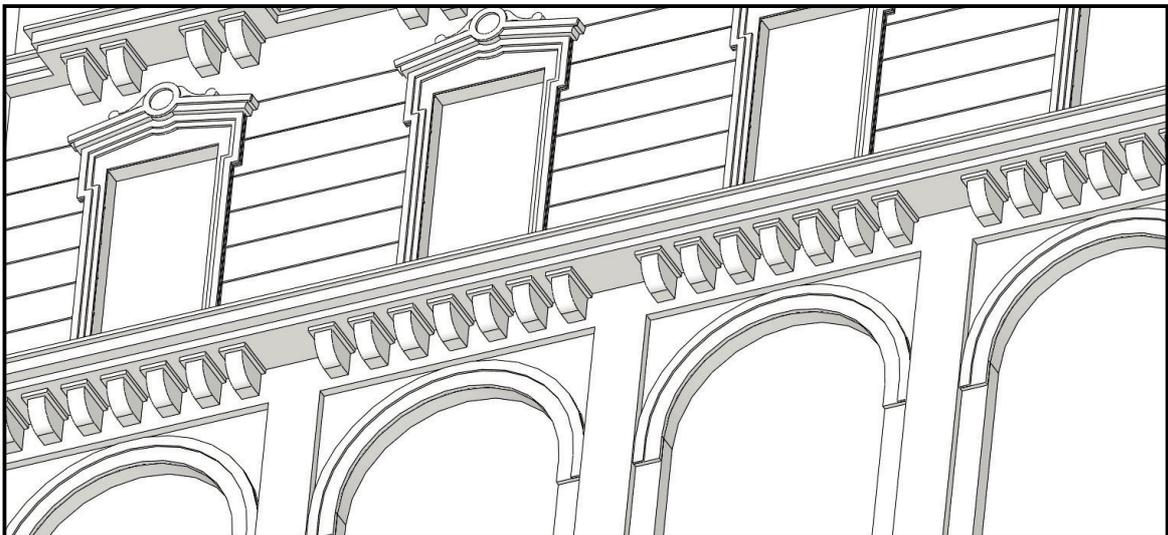

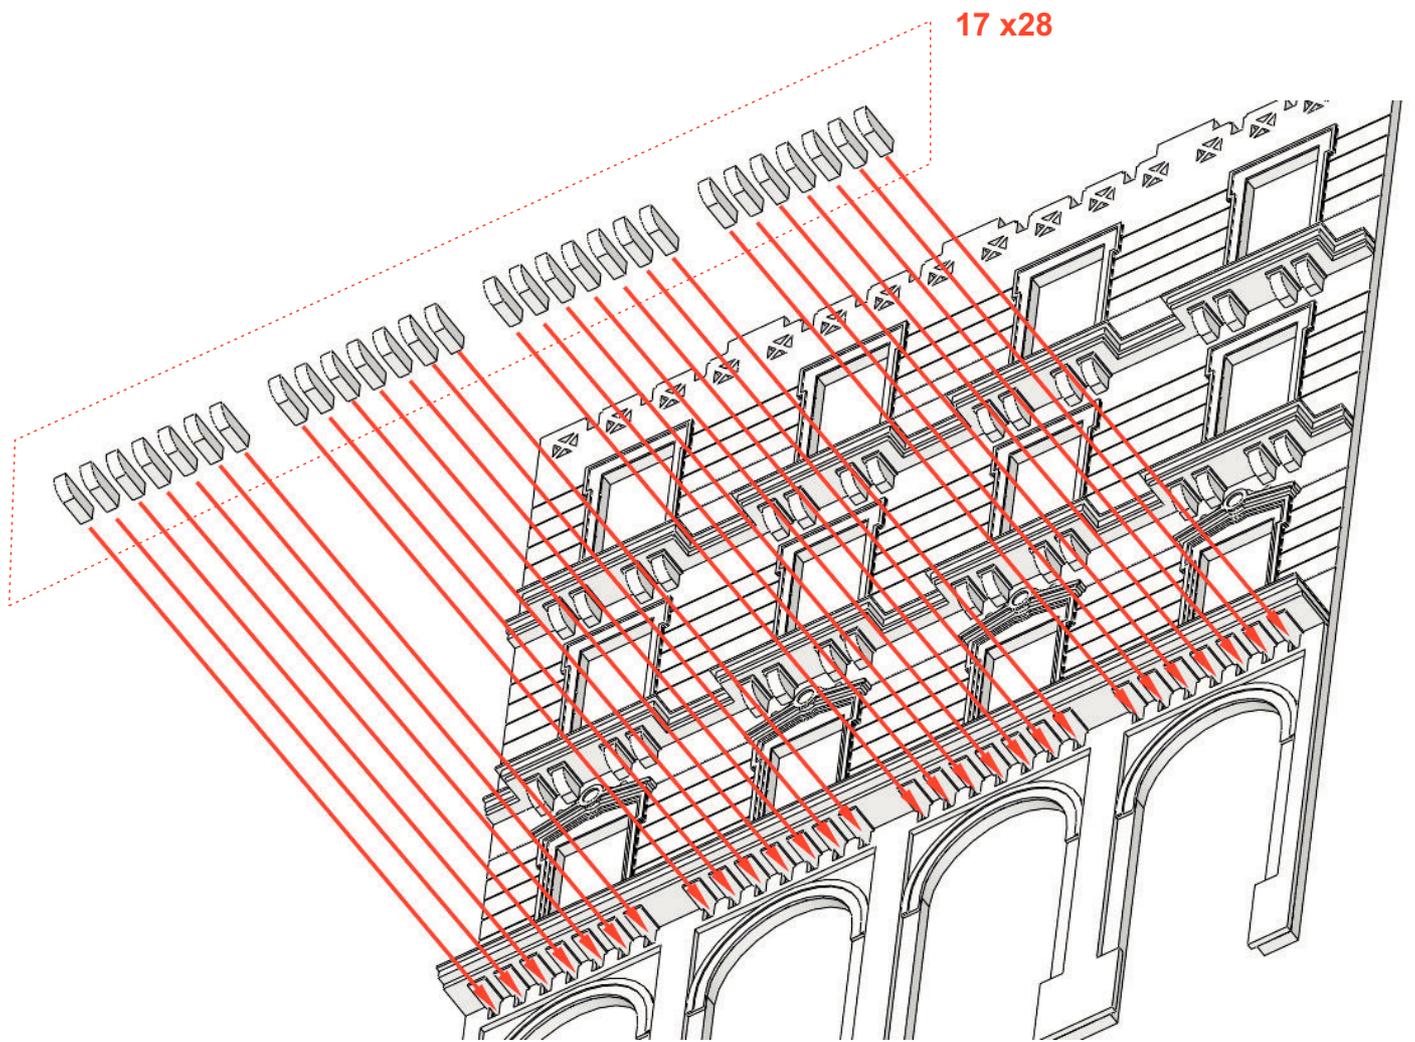

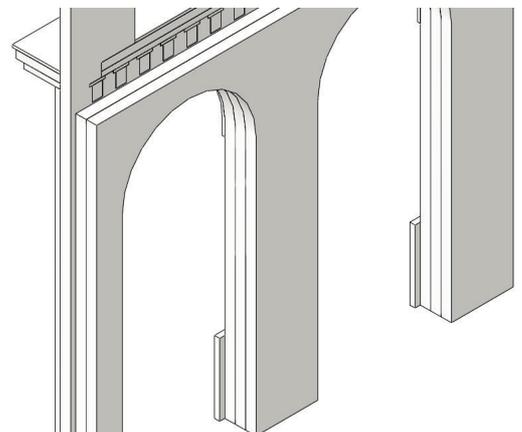

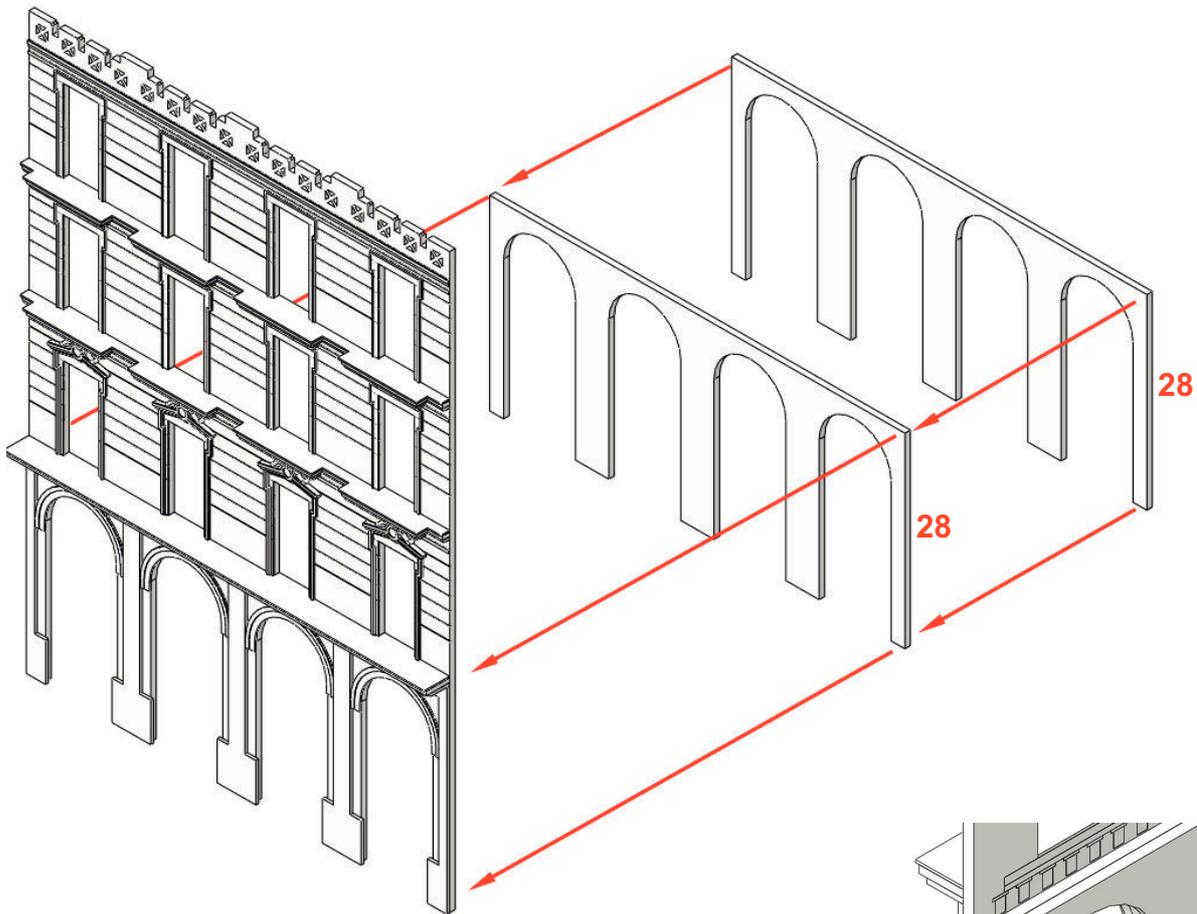

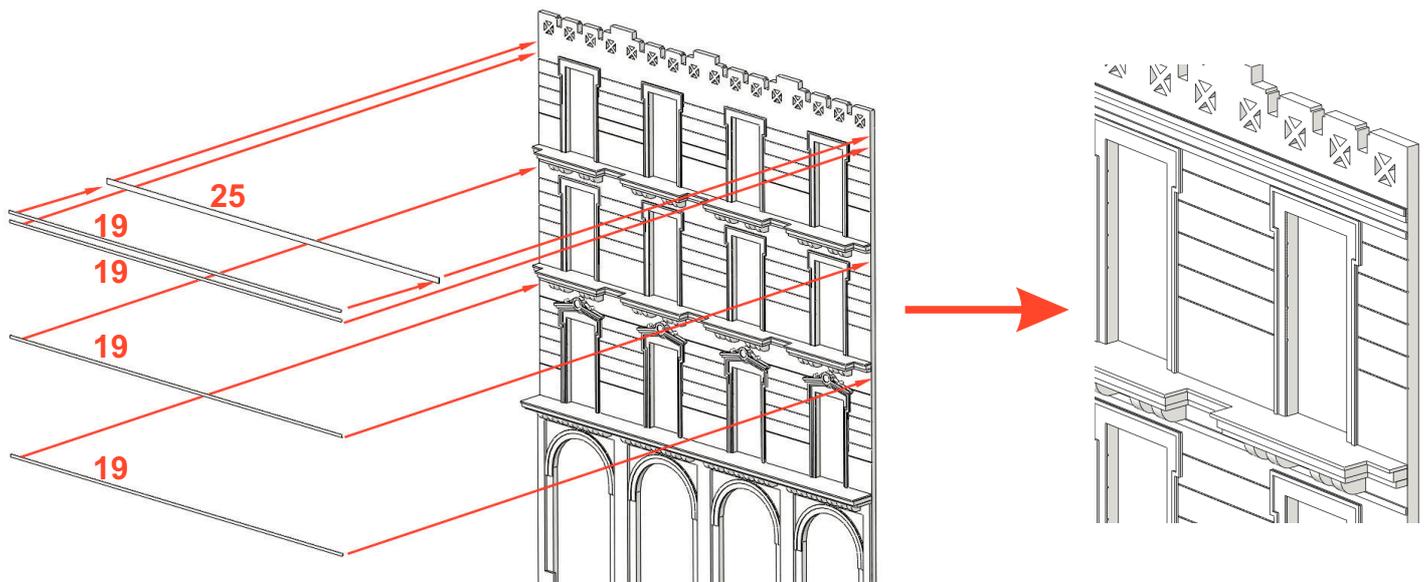

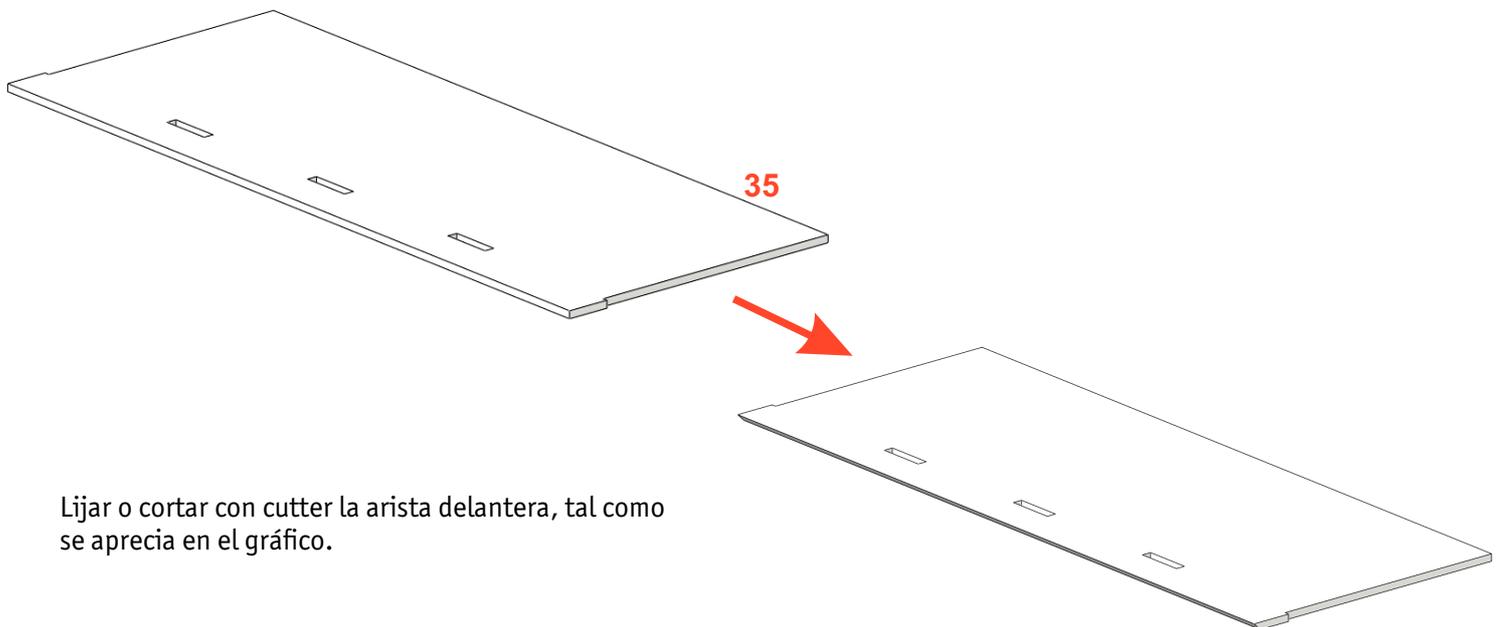

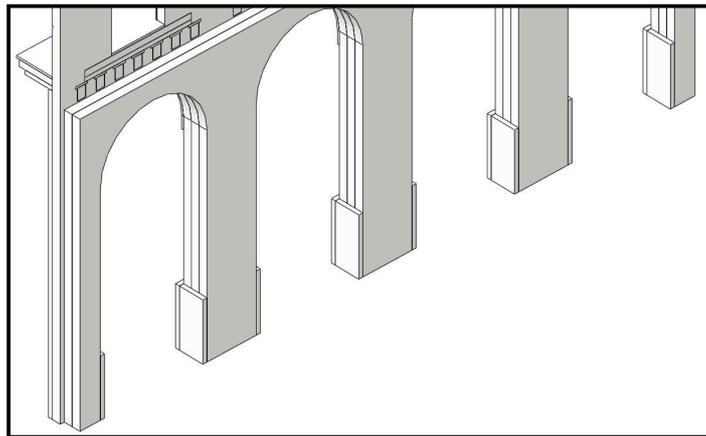

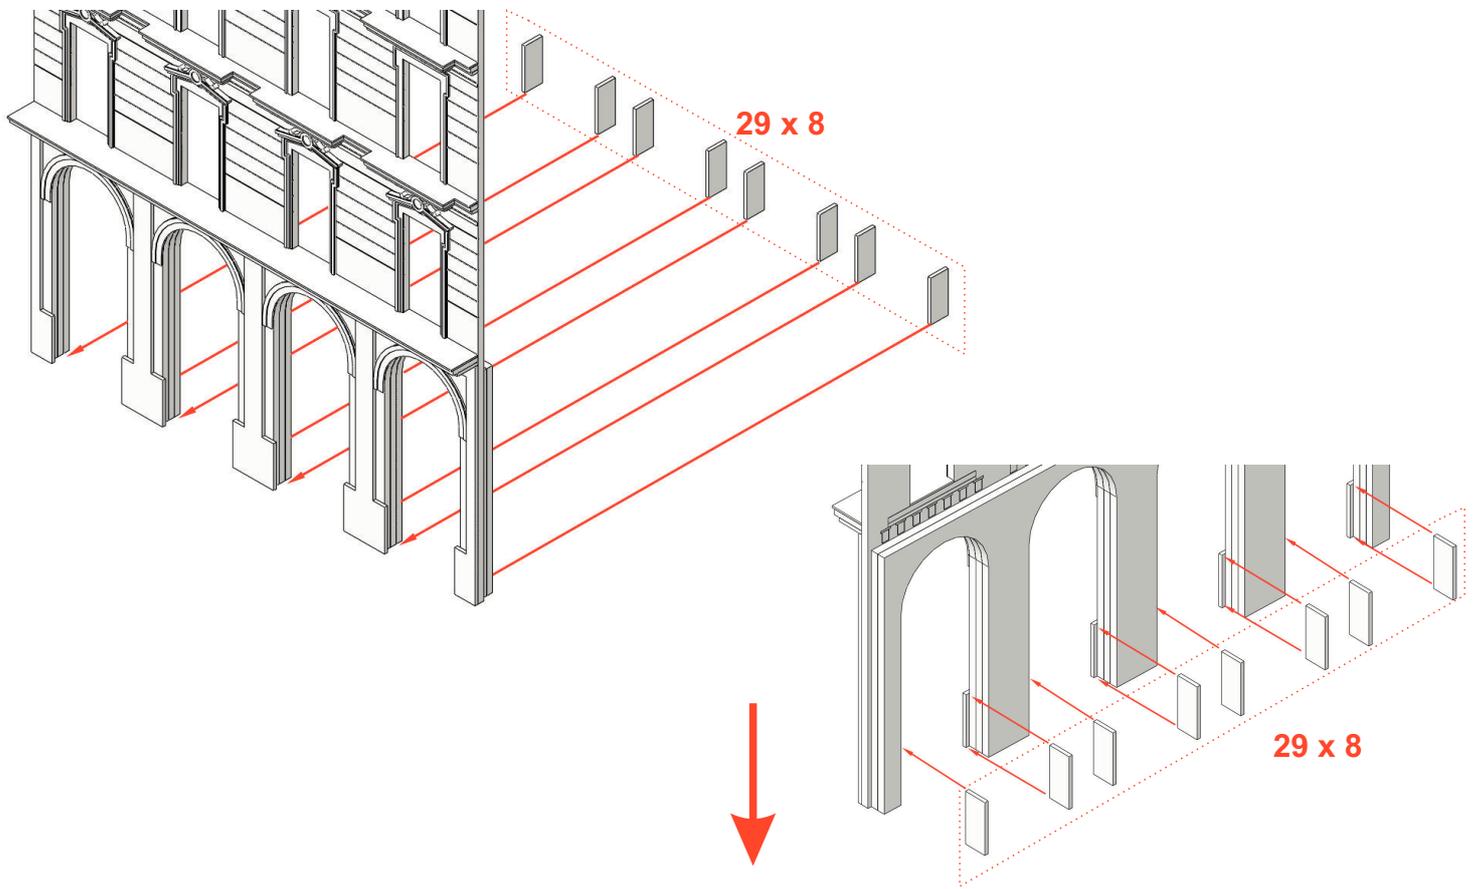

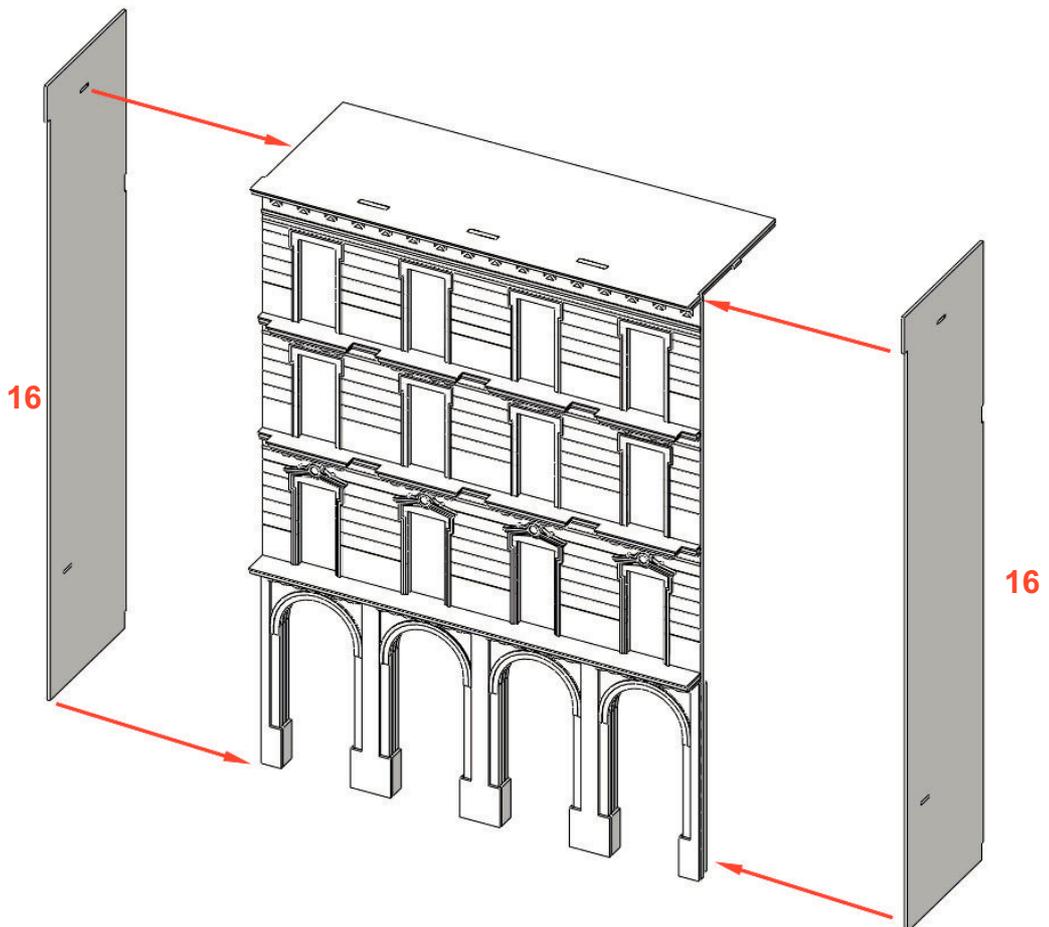

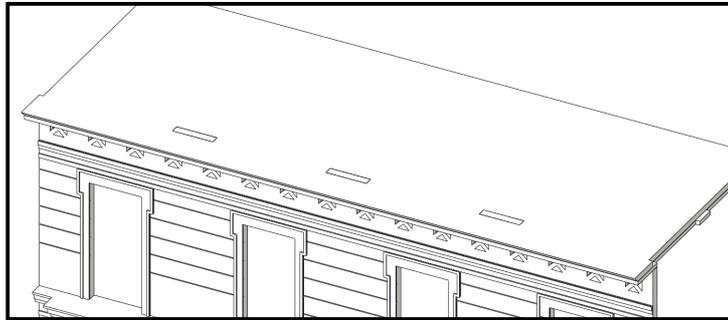

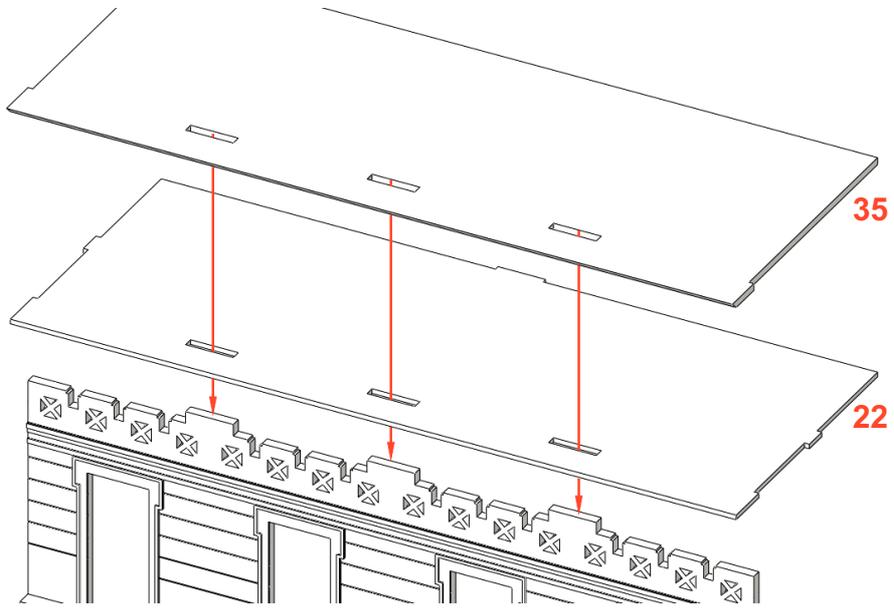

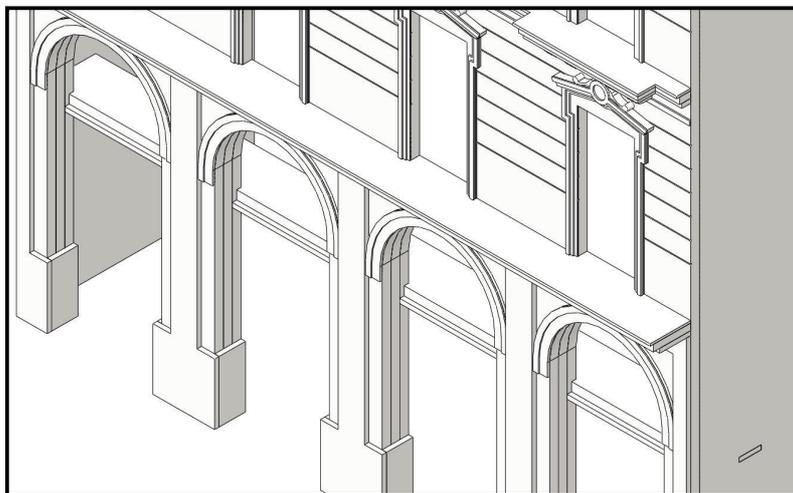

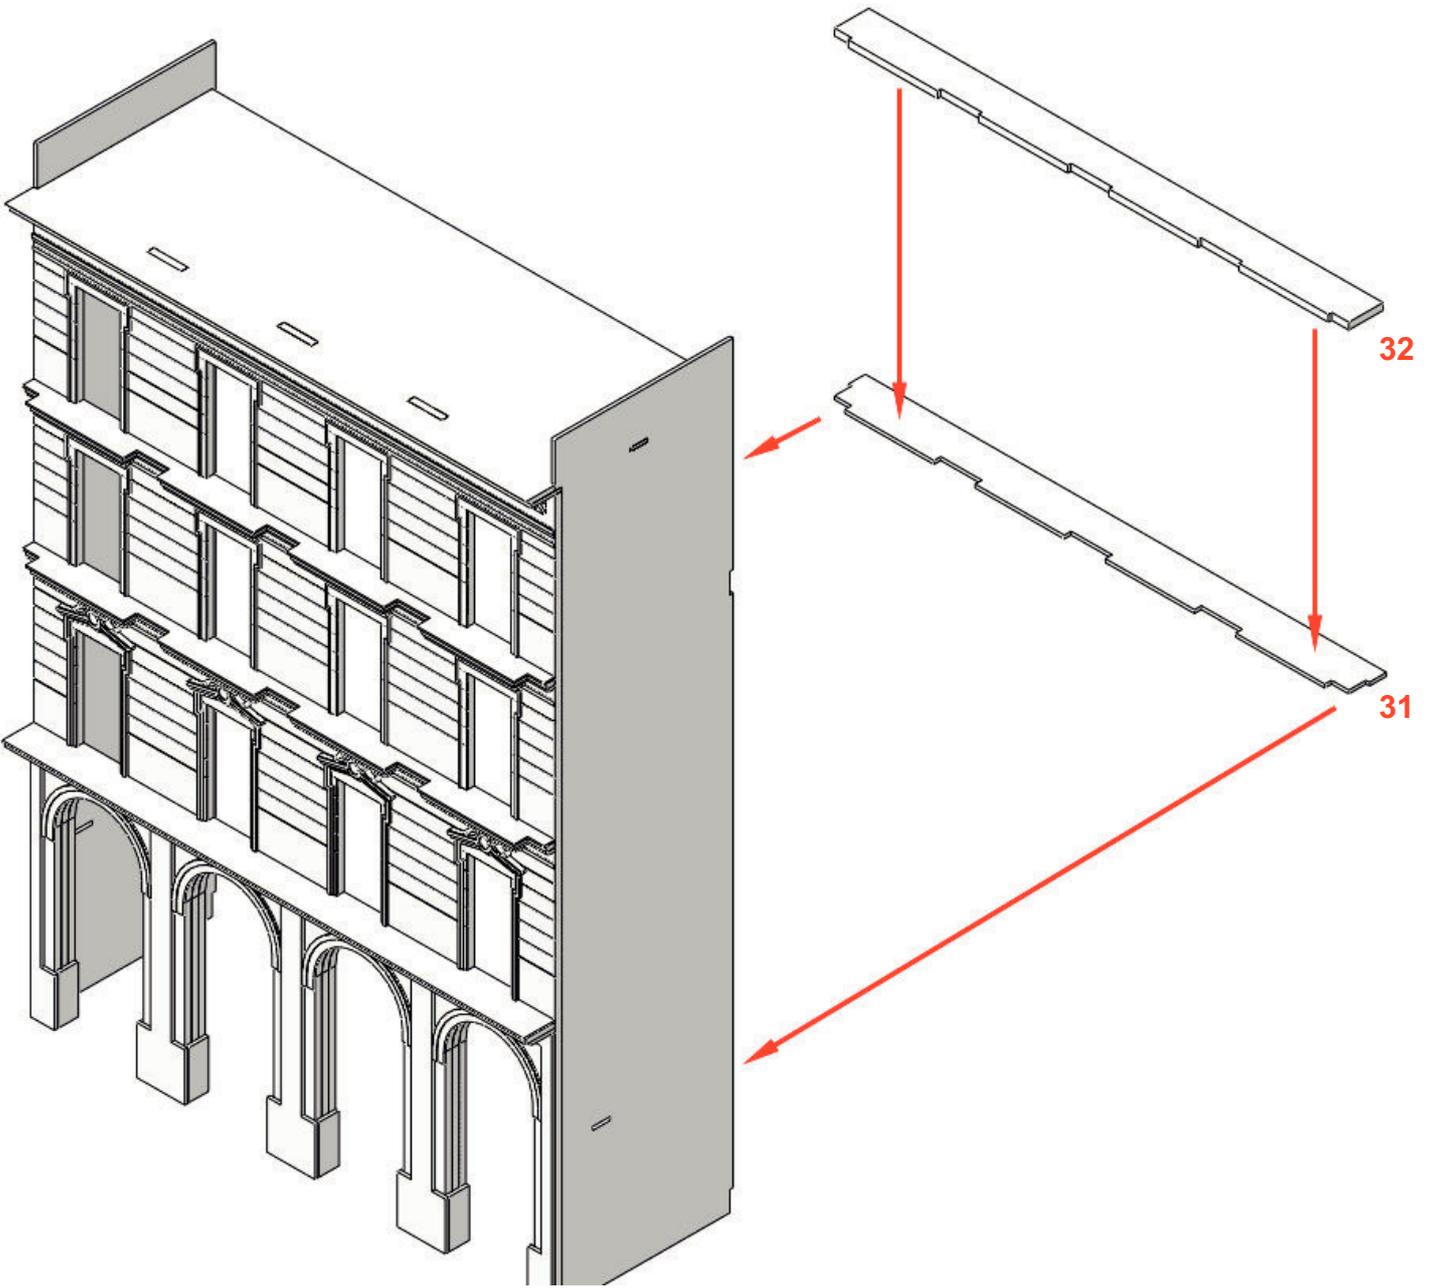

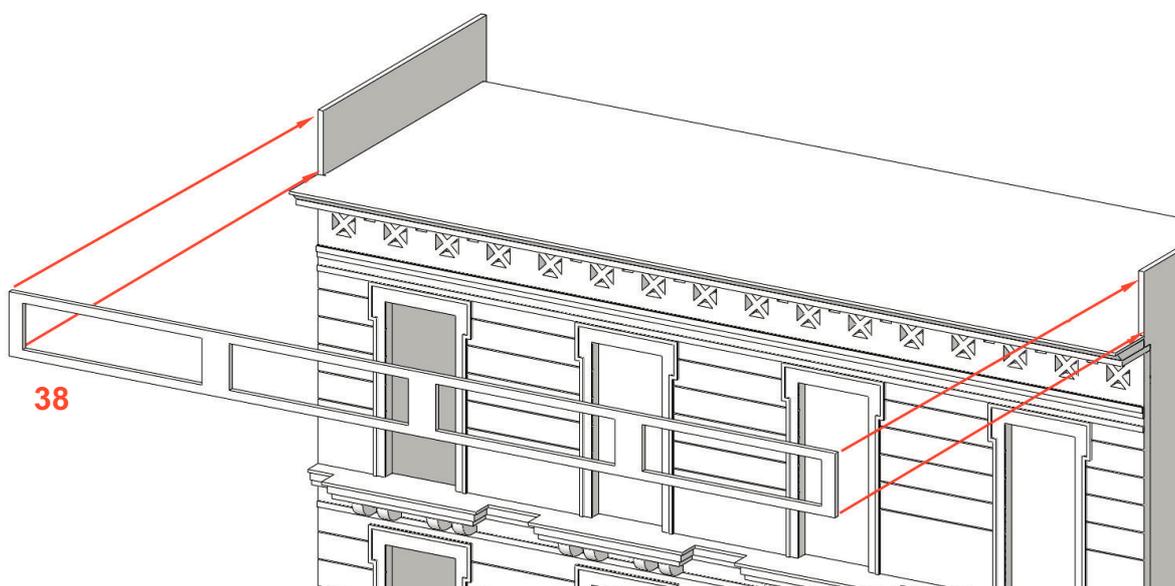

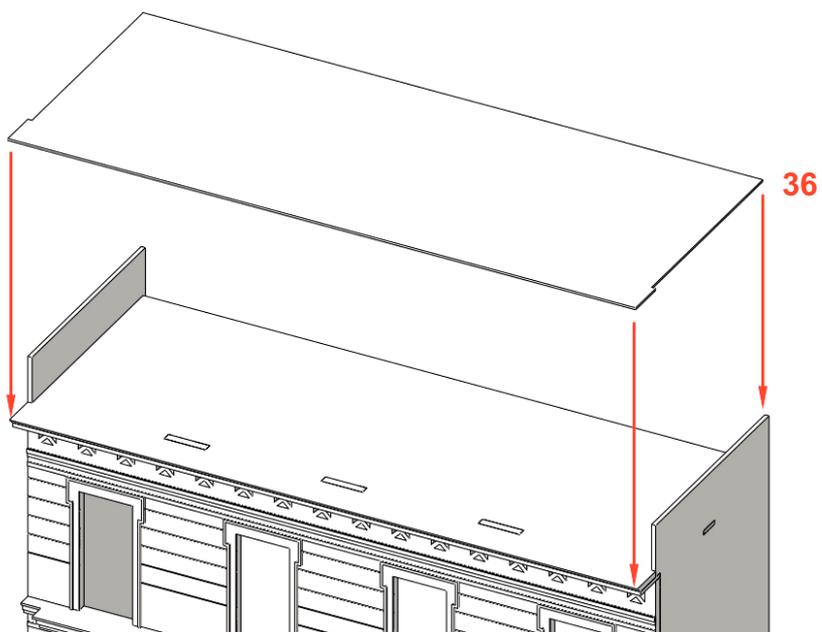

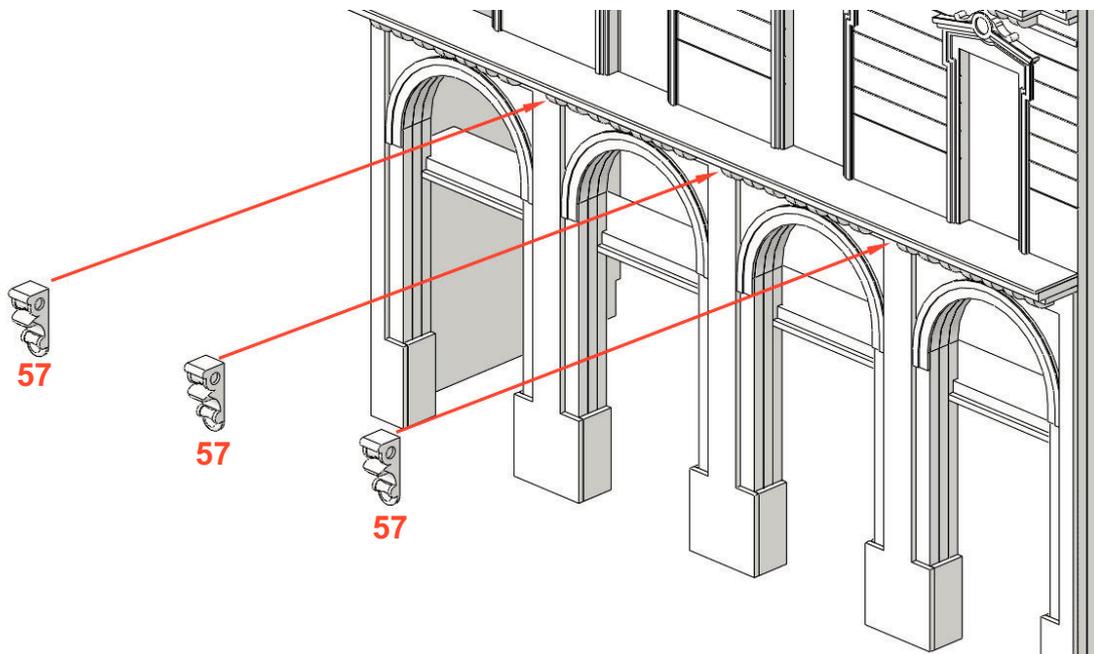

Como se puede ver en el gráfico de la derecha, las dos piezas que acaba de pegar no llegan hasta el exterior de la fachada. Debe quedar 1 mm libre para pegar las paredes laterales

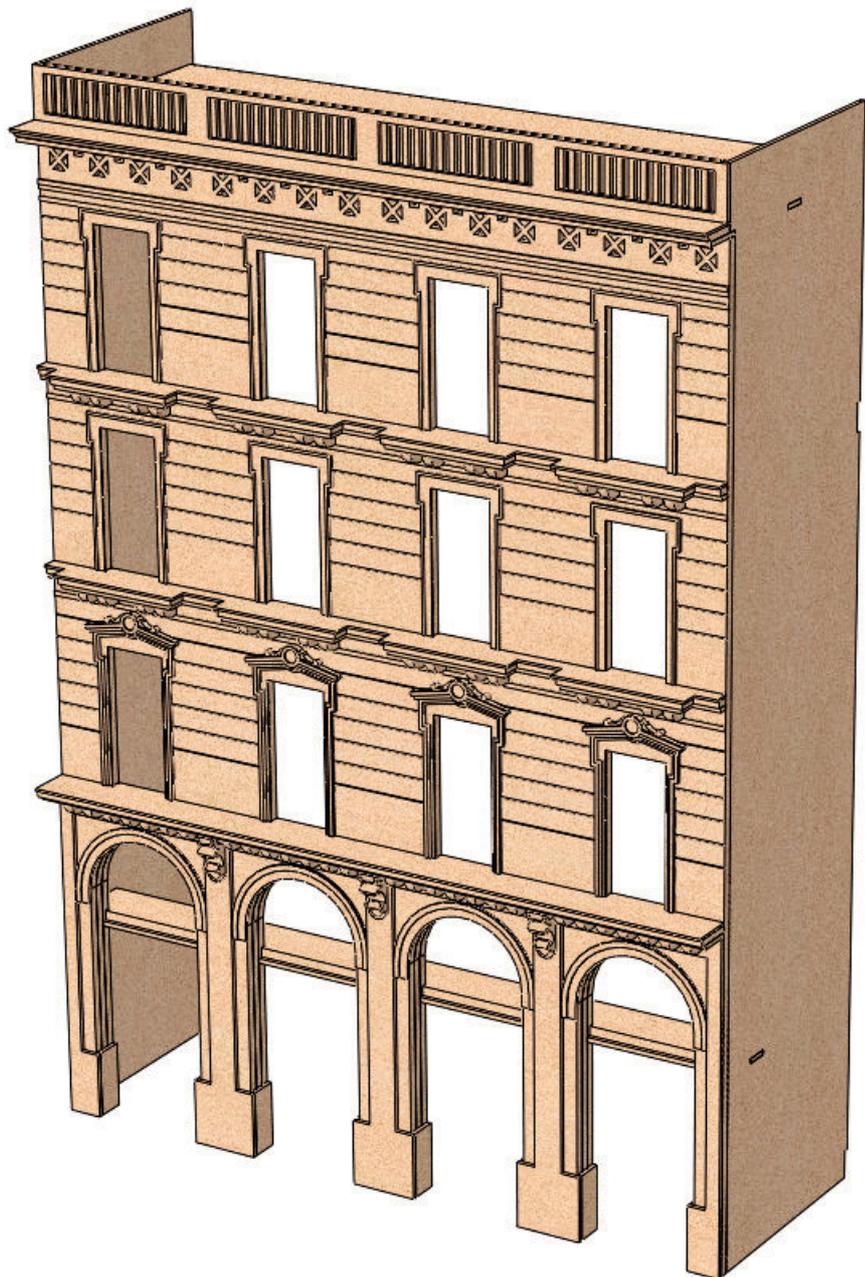

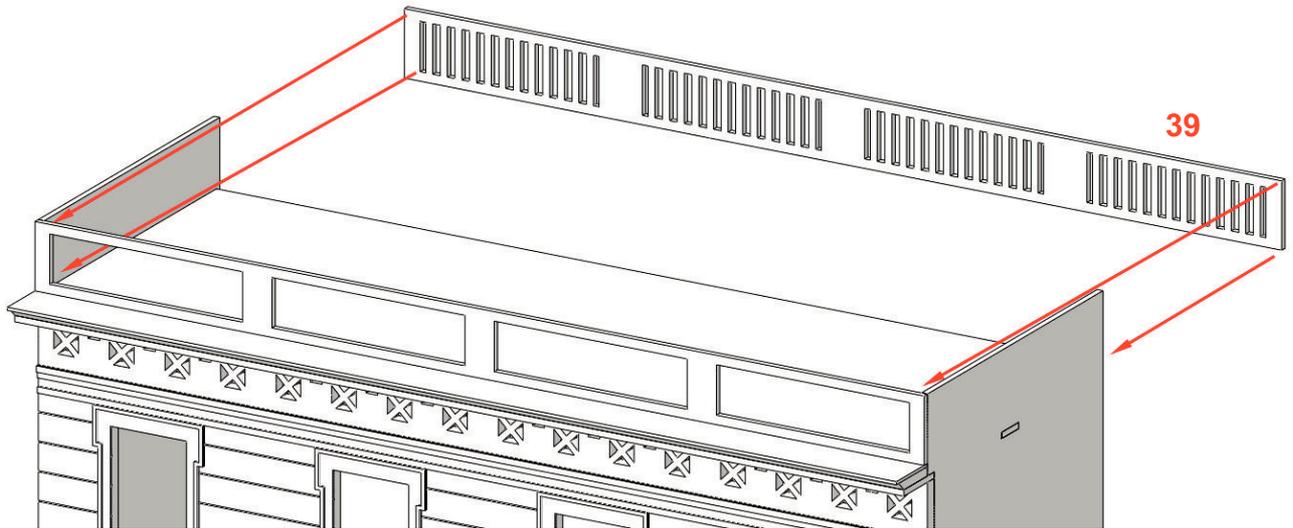

Lijar o cortar con cutter la arista delantera, tal como se aprecia en el gráfico.

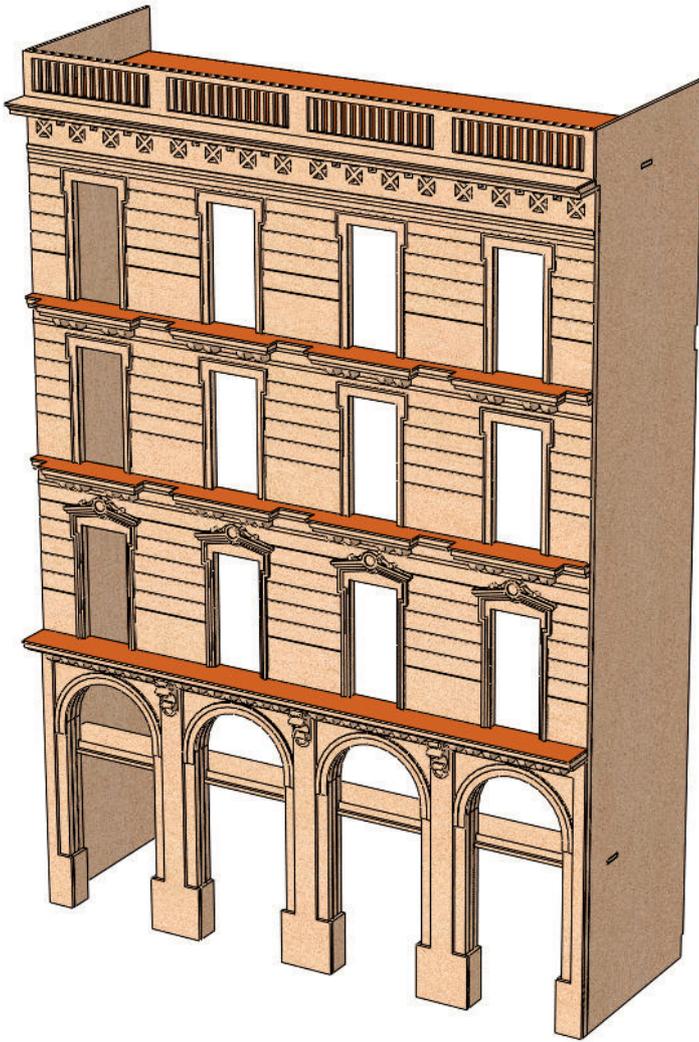

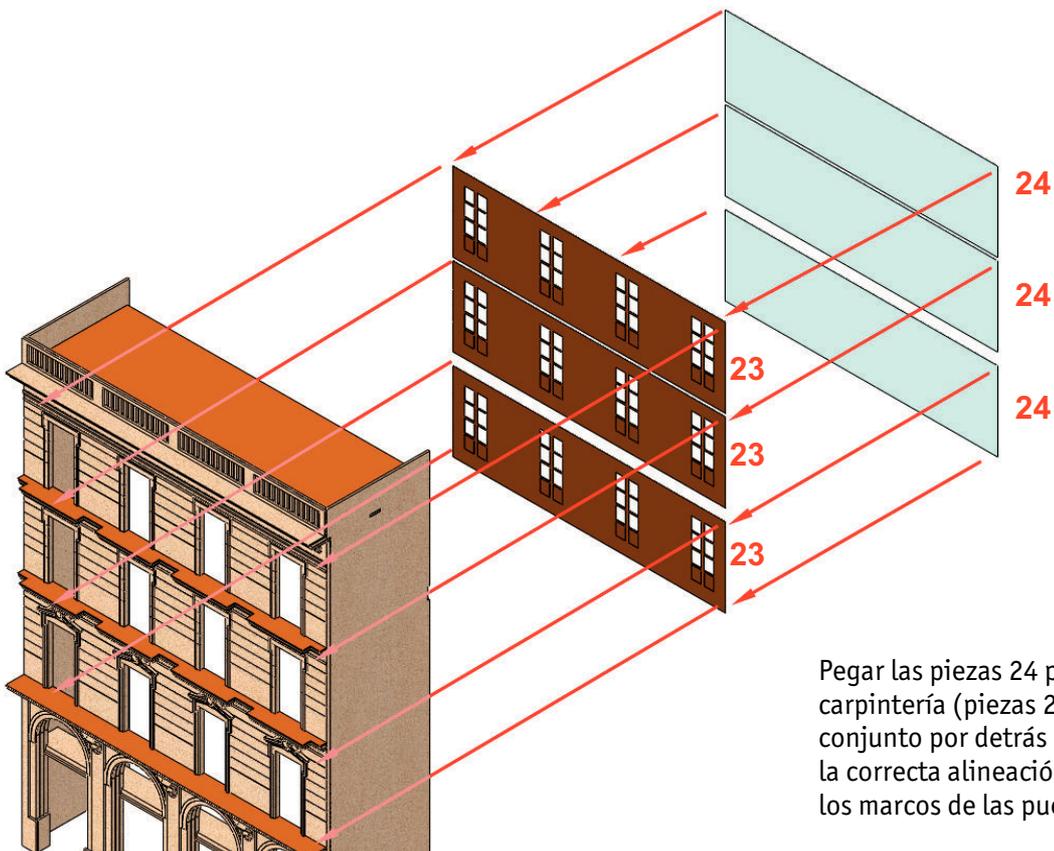

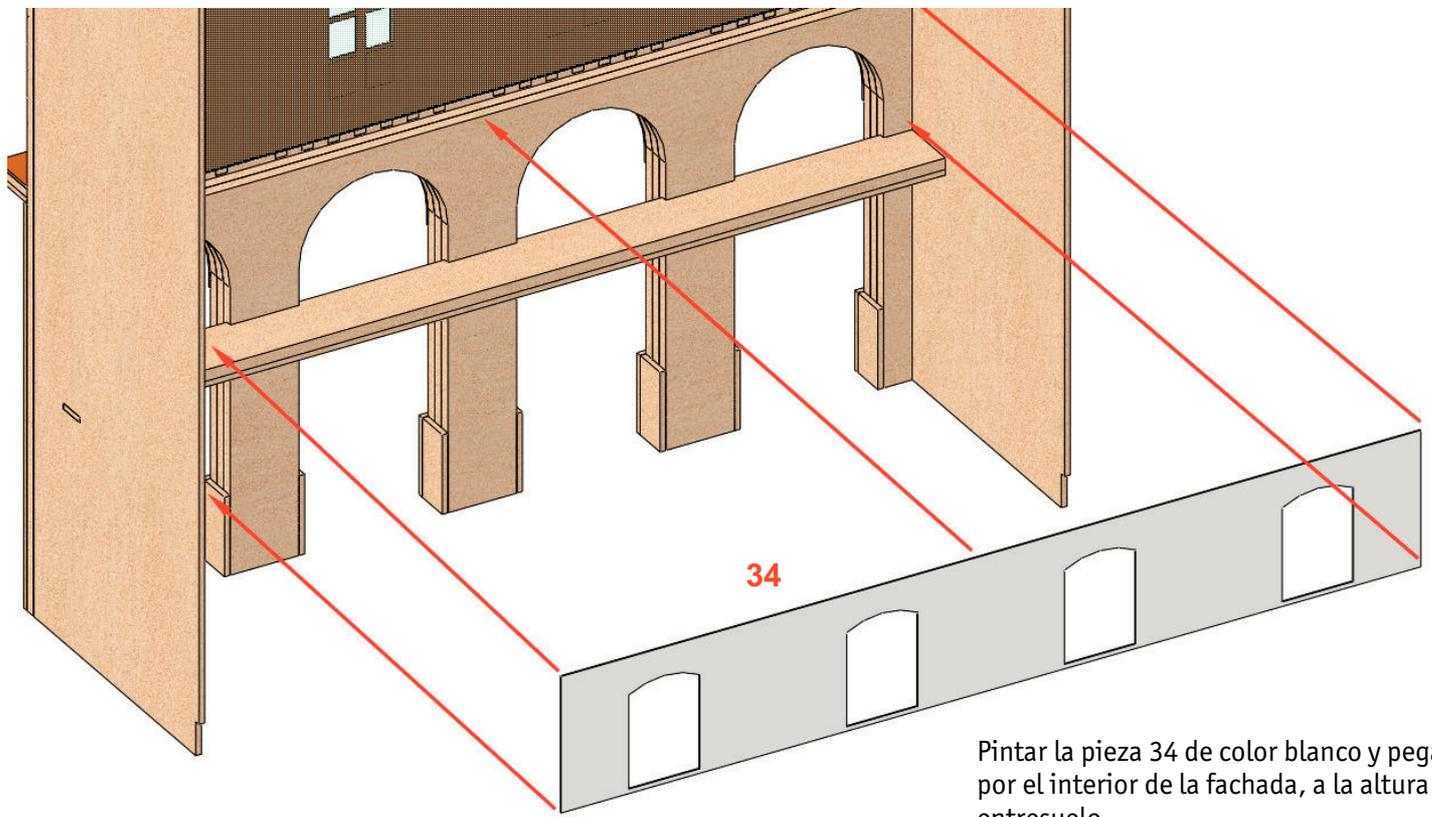

Pintar todo el conjunto montado hasta ahora del color piedra que prefiera

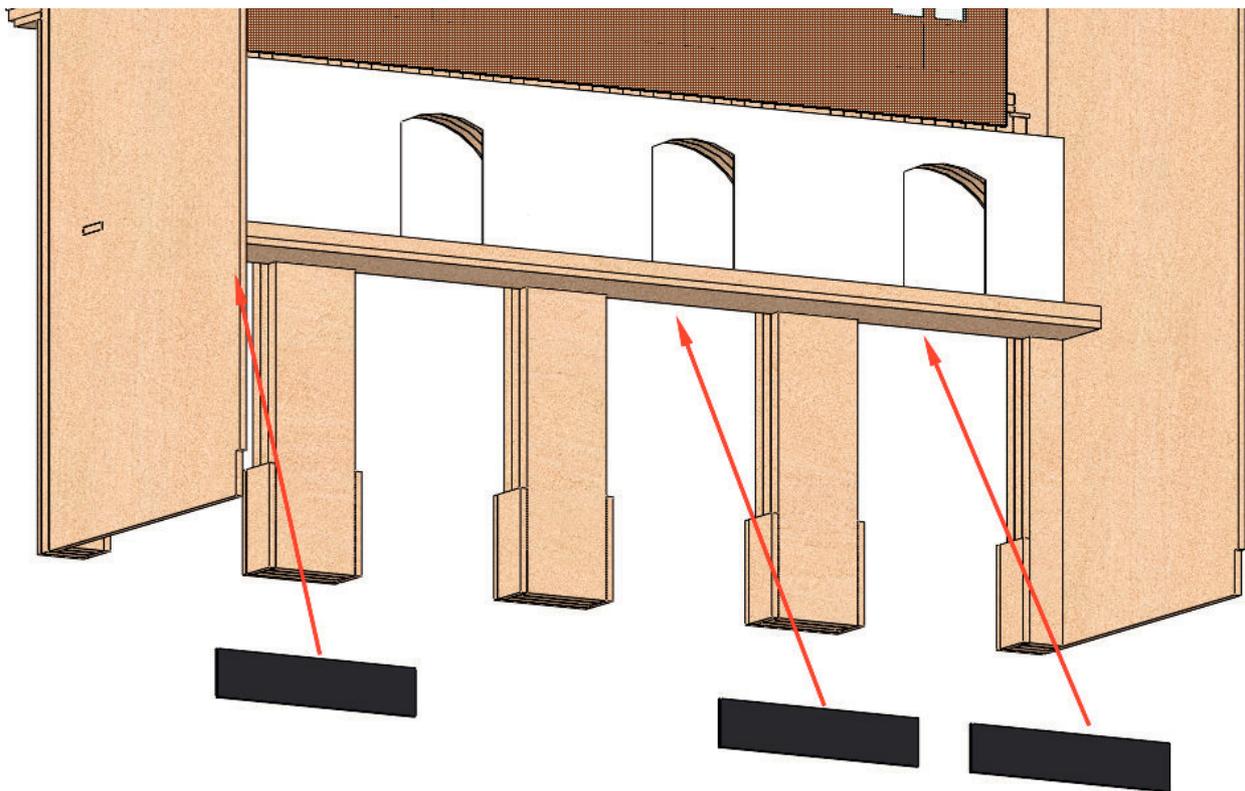

Pintar a pincel las superficies de balcones y terraza superior de color arcilla

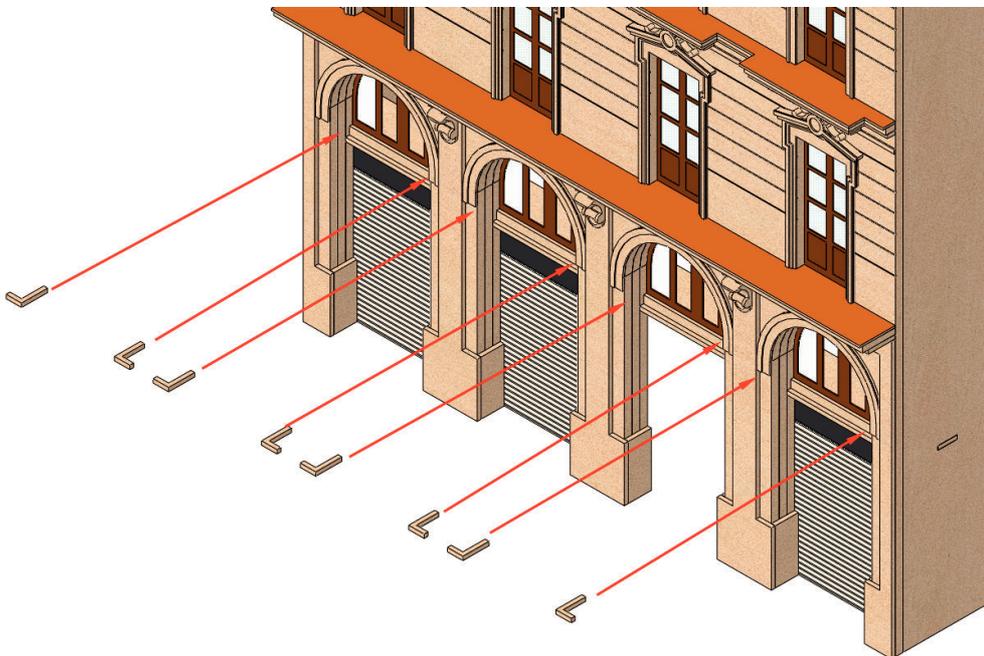

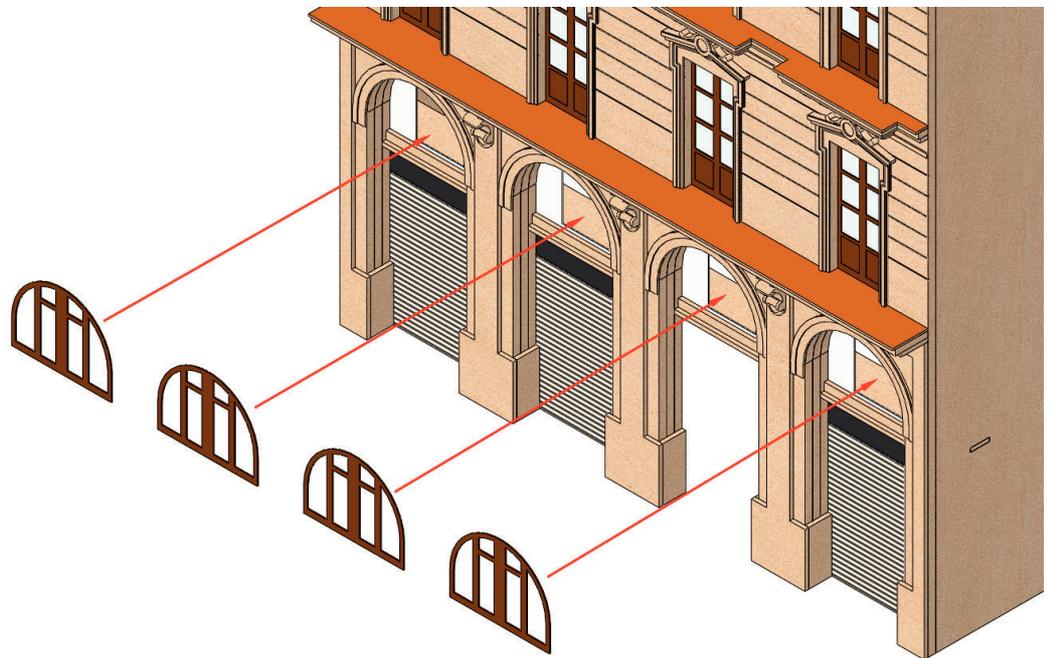

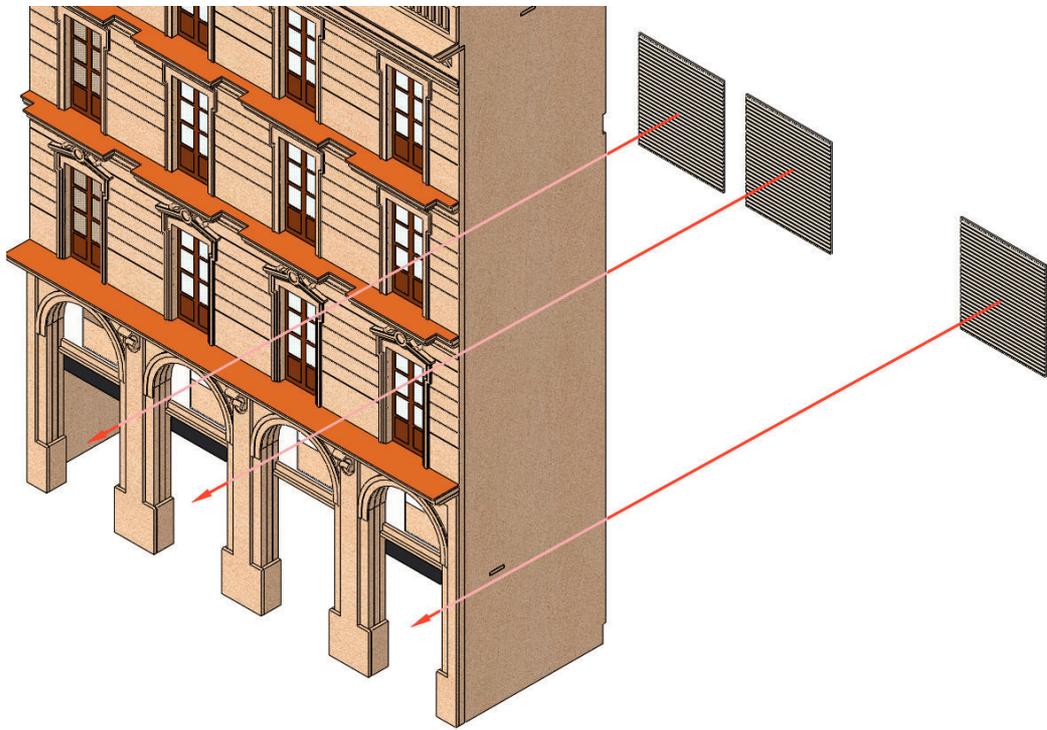

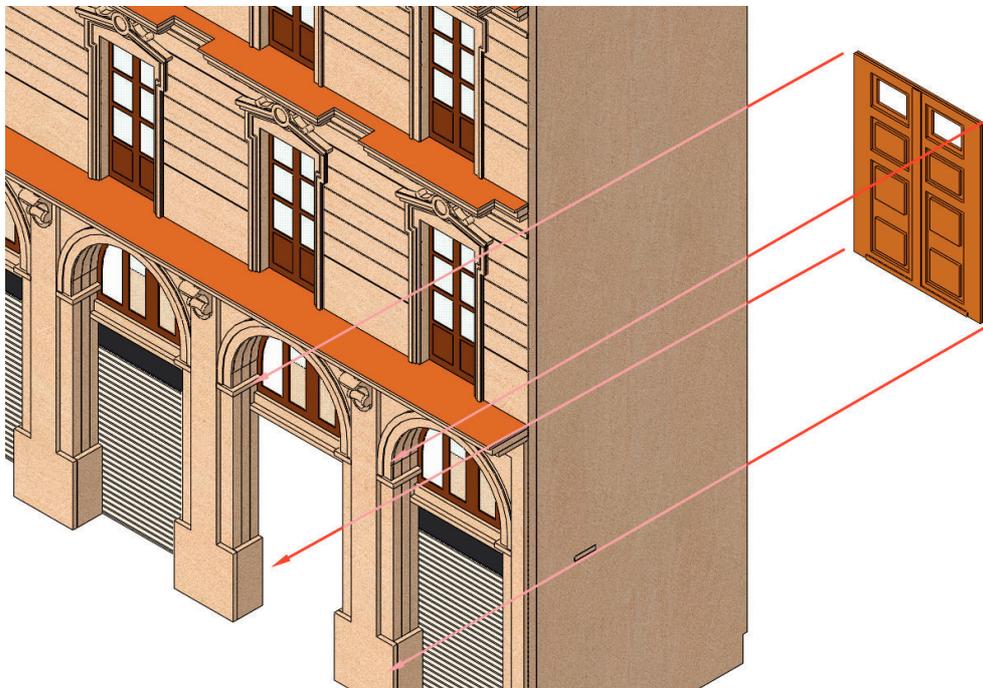

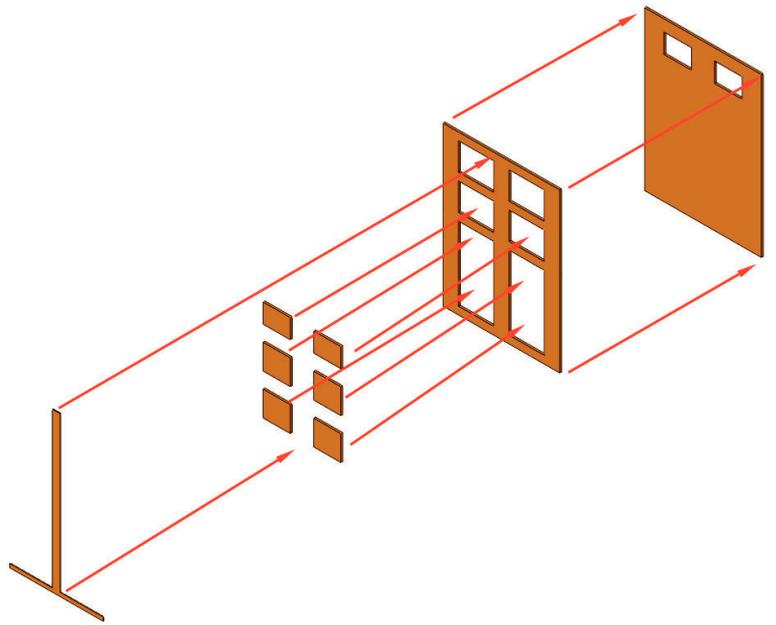

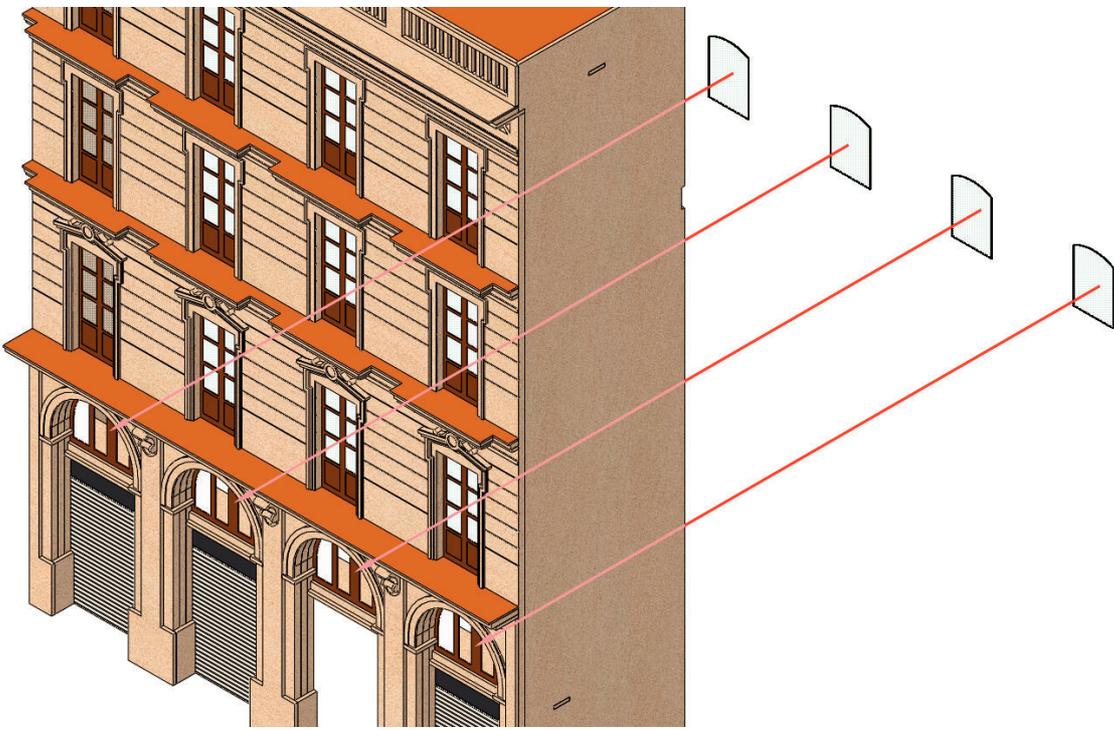

Pegar las piezas 24 por detrás de la carpintería (piezas 23) y luego pegar el conjunto por detrás de la fachada. Observar la correcta alineación de la carpintería con los marcos de las puertas de los balcones.

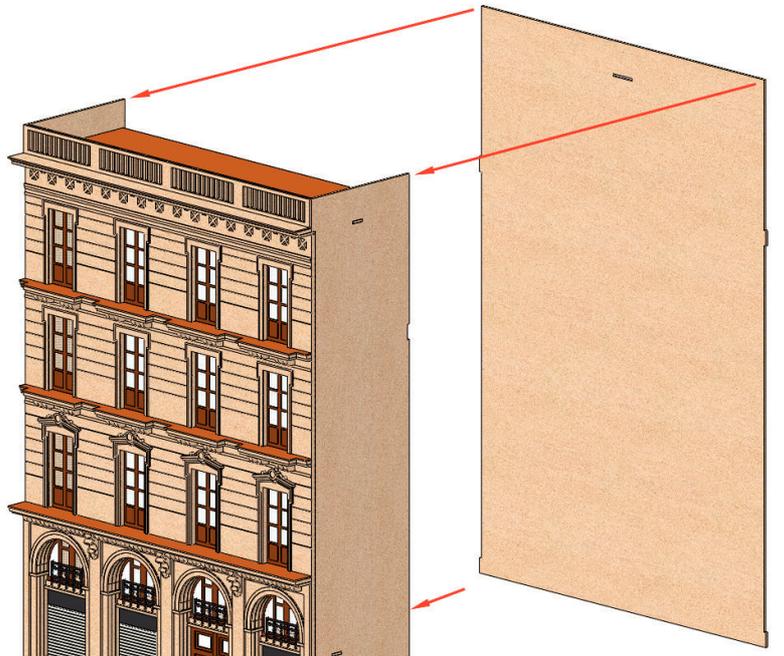

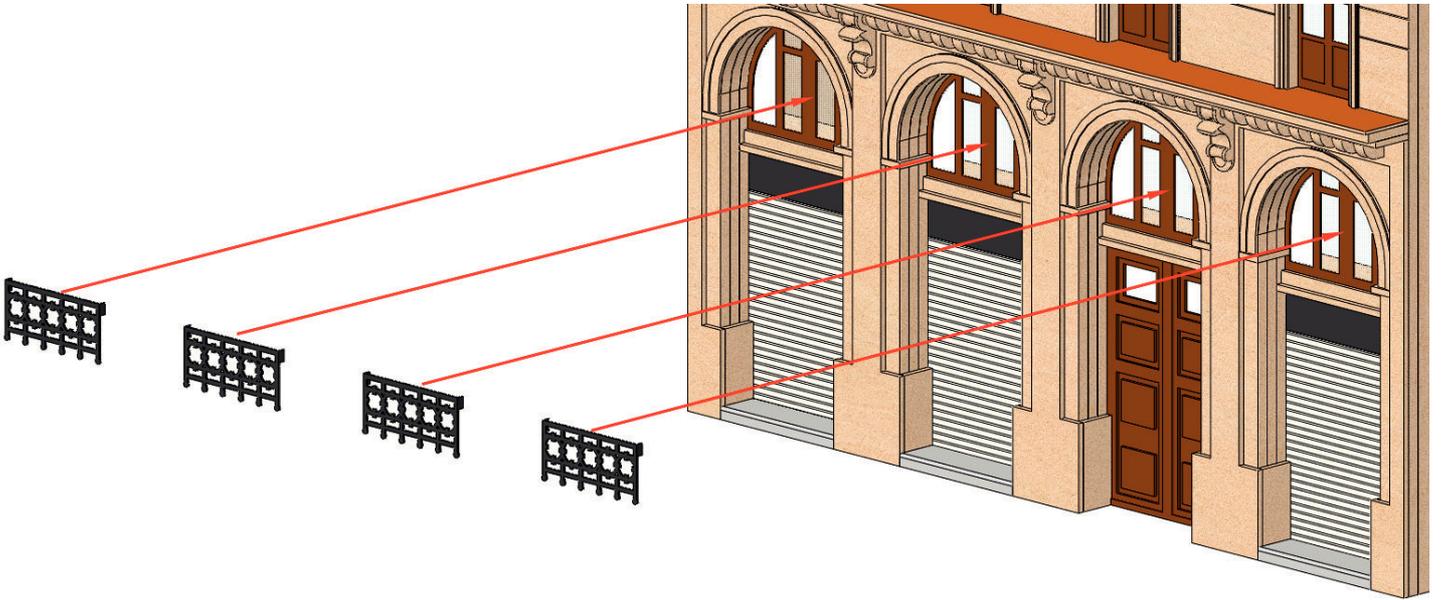

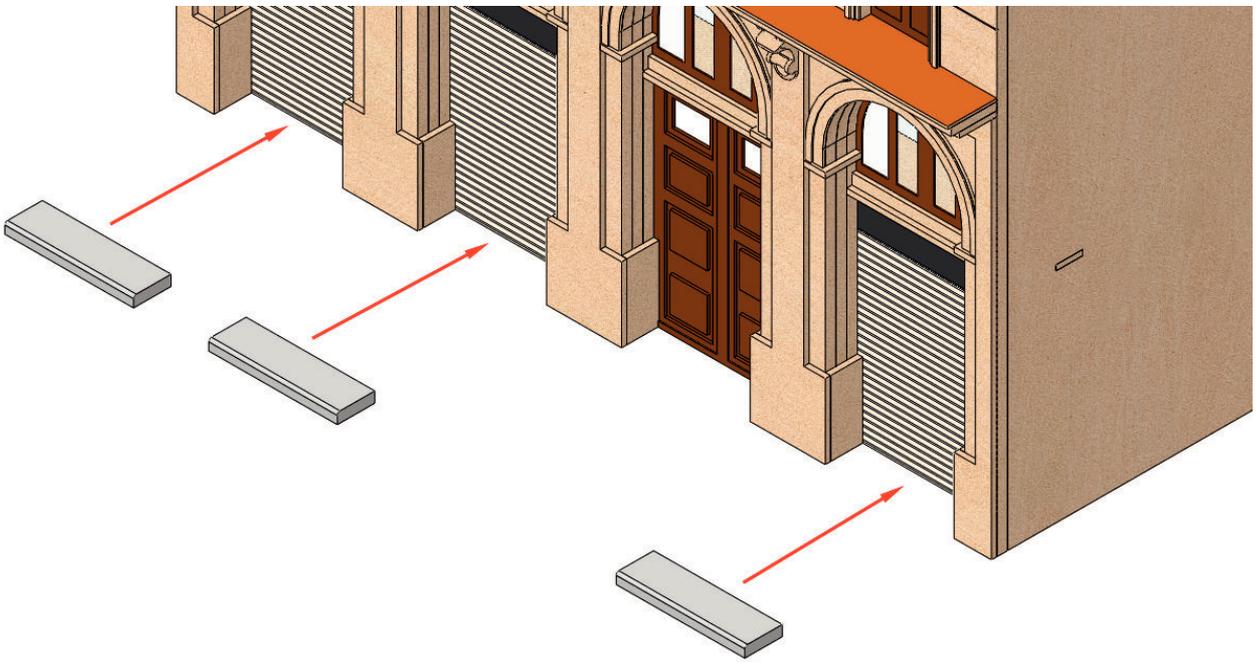

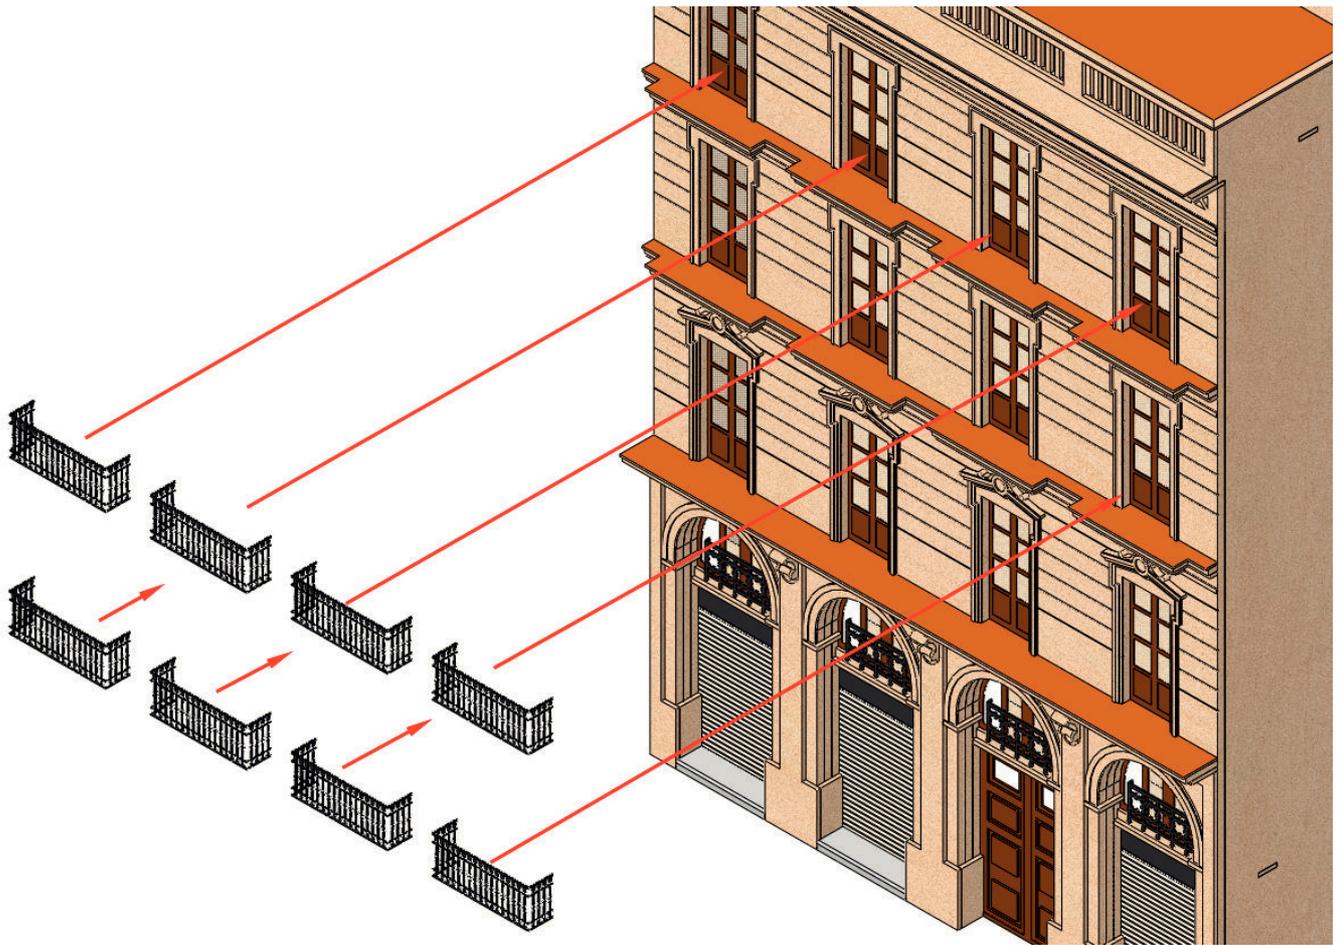

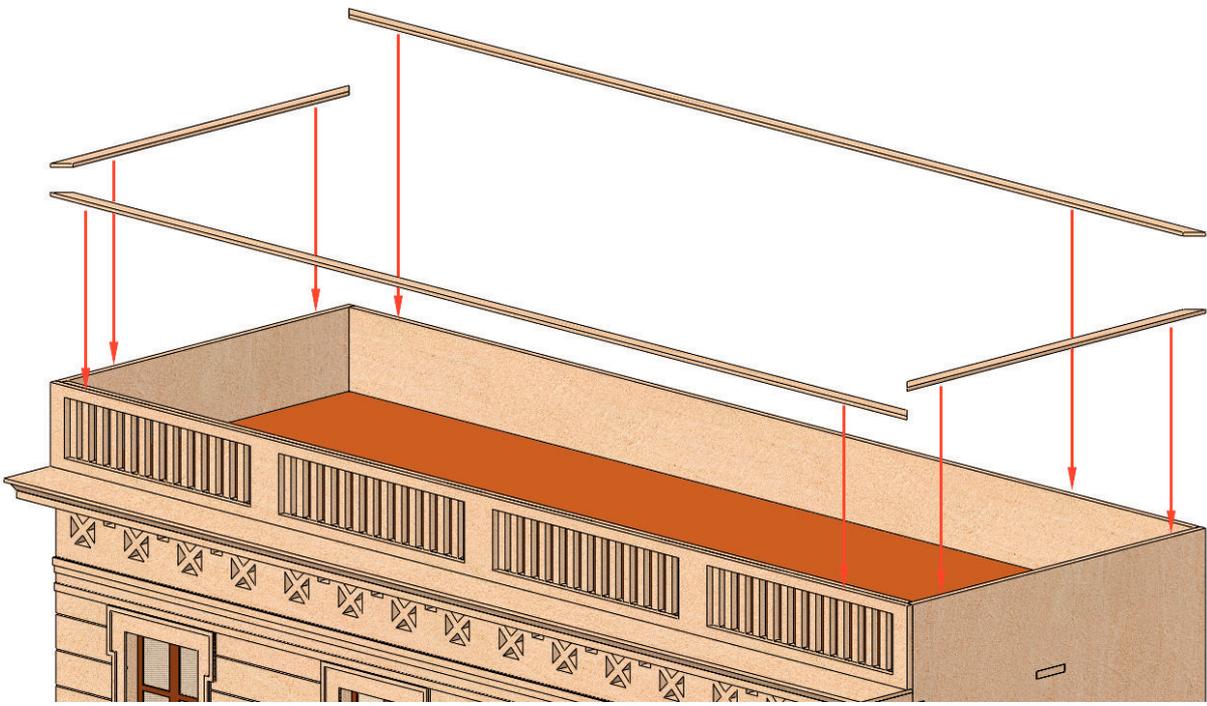

Pintar la pieza 34 de color blanco y pegar por el interior de la fachada, a la altura del entresuelo.

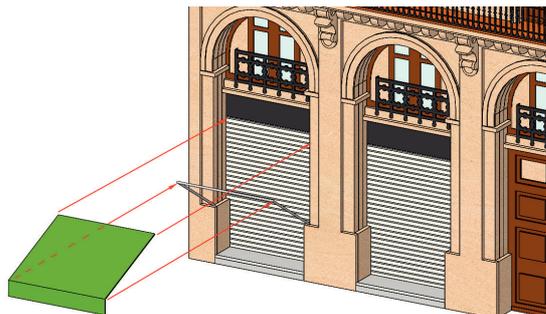

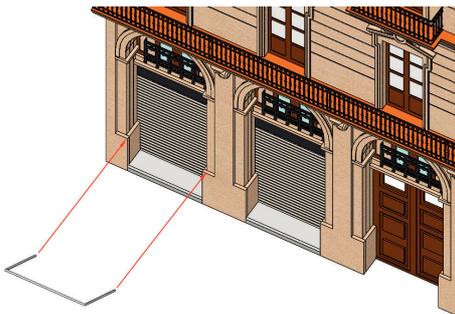

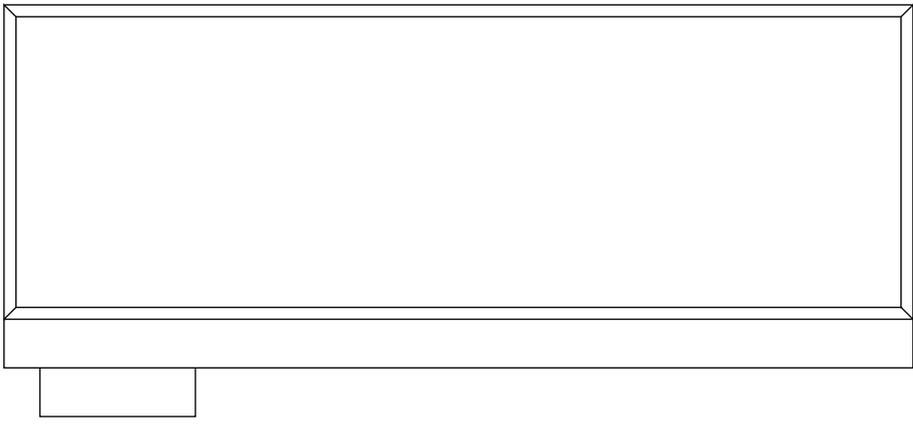

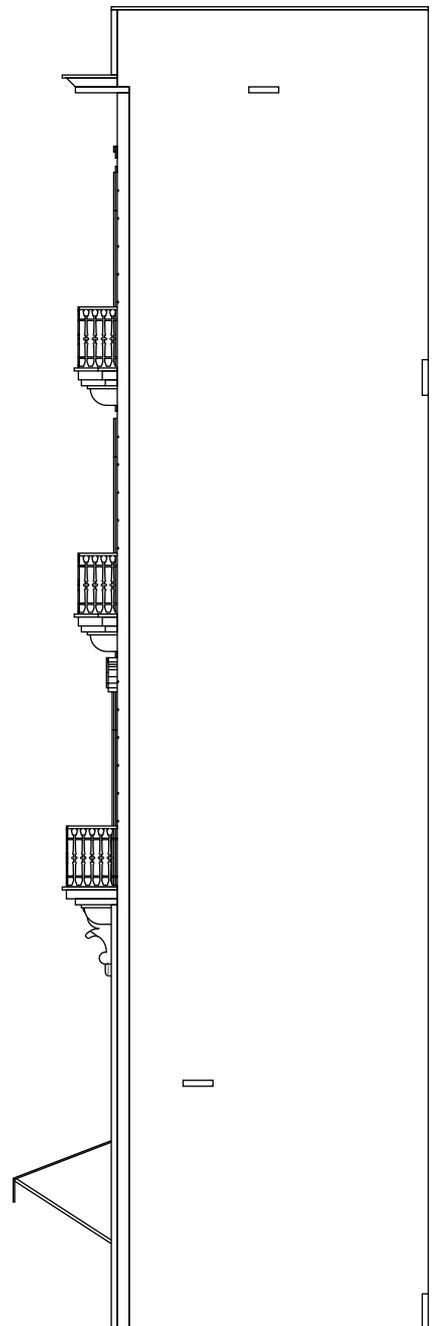

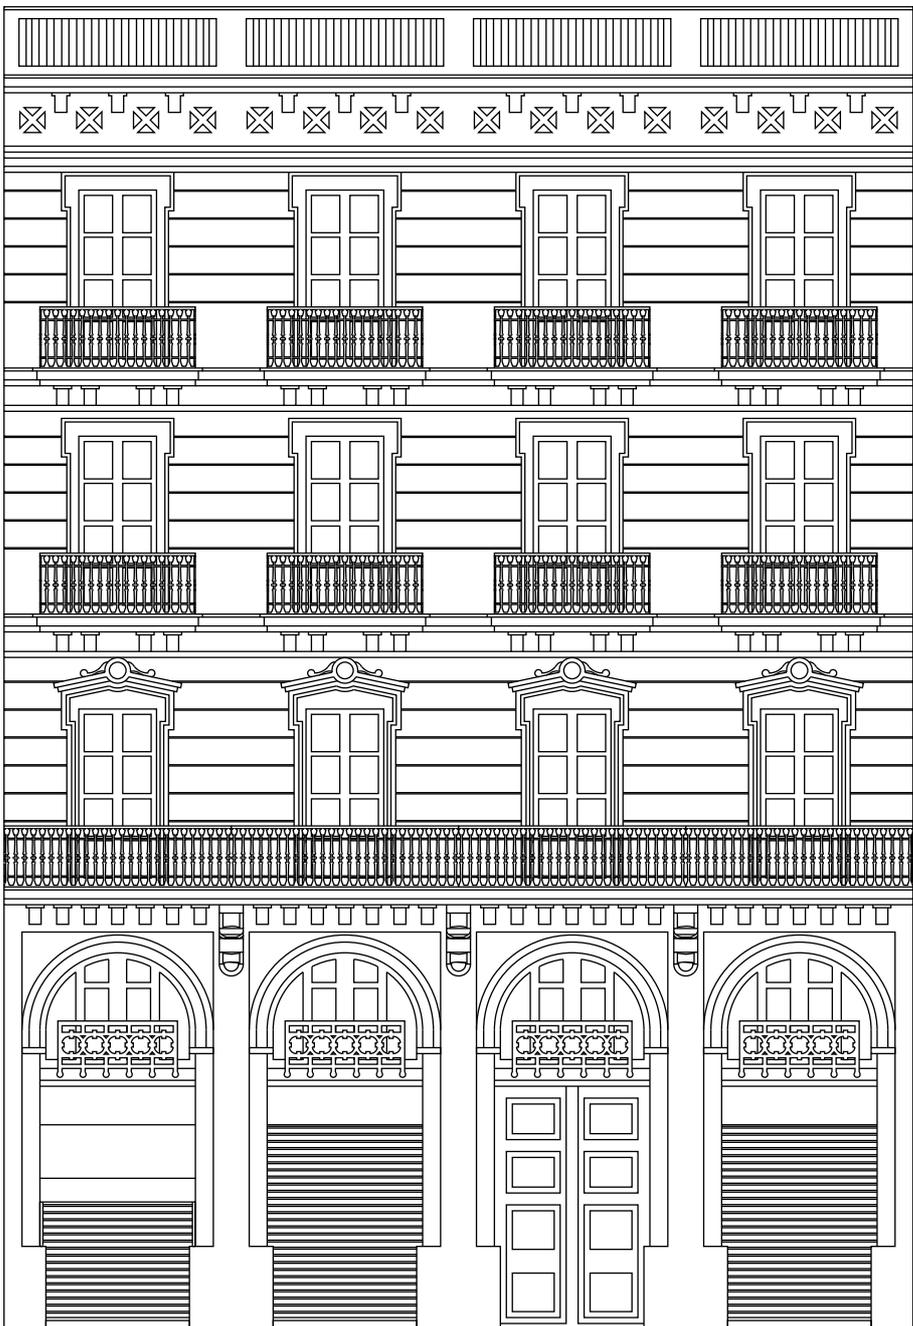

61,20 mm

152,00 mm

175,39 mm
